[\[All 1z0-1085-20 Questions\]](#)

---

A customer wants to deploy a customized e-commerce web application using multiple virtual machines, block storage, databases, load balancer and a web application firewall.

What cloud model can be used to host this application?

- A. Infrastructure as a Service (IaaS)
- B. Software as a Service (SaaS)
- C. Platform as a Service (PaaS)
- D. Anything as a Service (XaaS)

Show Suggested Answer

Question #: 2

Topic #: 1

[\[All 1z0-1085-20 Questions\]](#)

---

A new customer has logged into Oracle Cloud Infrastructure (OCI) as an administrator for the first time. The admin would like to deploy infrastructure into a region other than their home region.

What is the first step they must take in order to accomplish this task?

- A. Navigate to the desired region and begin creating resources.
- B. Subscribe to the desired region.
- C. Use API endpoints to create resources in the desired region.
- D. File a service request for access to each additional region.
