@25:43 Security SE Module 5 Visibility and Enforcement - Video

upvoted 1 times

🗨️ **Itachi\_Uchiha** 2 years, 3 months ago

B,D are the answers:

ISE does not actively provides visibility: its AMP4N and AMP4E with NGFW/IPS that provides visibility into the network. ISE is used for policy on who and how an identity will access the system and what access levels will be granted.
