Actual exam question from Microsoft's AZ-600

Question #: 1

Topic #: 1

[All AZ-600 Questions]

DRAG DROP -

You deploy an Azure Stack Hub integrated system that contains an Azure App Service deployment. The integrated system uses an Azure Active Directory (Azure AD) identity provider.

You need to provide users with the ability to deploy App Service web apps directly from their GitHub repositories.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Register an Azure AD application

Create a GitHub action

Modify the Source control configuration settings of the App Service resource provider

Register a GitHub application

Create a GitHub account

Topic #: 1

[All AZ-600 Questions]

You have an Azure Stack Hub integrated system.

You plan to install the Event Hubs resource provider.

You purchase a public wildcard certificate that has a subject name of

*.eventhub.chicago.contoso.com. The path to the certificate is C:\Certificates\ssl.pfx.

You need to validate whether the certificate meets the requirements of Azure Event Hubs.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

    A. Install the AzureStack.Identity PowerShell module

    B. Rename the certificate file as Eventhub.pfx

    C. Run the Invoke-AzsHubEventHubsCertificateValidation cmdlet

    D. Run the Invoke-AzsHubDeploymentCertificateValidation cmdlet

    E. Install the Microsoft.AzureStack.ReadinessChecker Powershell module

    F. Convert the Ssl.pfx file to a CER file

Topic #: 1

[All AZ-600 Questions]

You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) identity provider.

You have a computer that runs Windows 10. You use the computer to manage the integrated system.

You create a custom marketplace item on the computer.

You need to publish the item to Azure Stack Hub Marketplace.

You create a storage account.

What should you create next?

A. a container that has a public access level of private

B. a file share that has the performance tier set to Hot

C. a container that has a public access level of blob

D. a file share that has the performance tier set to Transaction optimized

Question #: 6

Topic #: 1

[All AZ-600 Questions]

You have an Azure Stack Hub integrated system that uses an Active Directory Federation Services (AD FS) identity provider and capacity-based billing.

You have a plan named Plan1 that has the following quota configurations for Microsoft.Compute:

☞ Maximum number of Availability Sets: 10

☞ Maximum number of virtual machines: 50

☞ Maximum number of virtual machine cores: 100

☞ Maximum number of virtual machine scale sets: 10

You link two offers named Offer1 and Offer2 to Plan1.

Two user subscriptions named Customer1 and Customer2 are created based on Offer1. A user subscription named Customer3 is created based on Offer2.

Customer1 receives a warning that it provisioned 50 virtual machines.

You need to ensure that Customer1 can provision an additional 25 virtual machines within its existing subscription. The solution must NOT affect the quotas of the other user subscriptions.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Add NewPlan as an add-on to Offer1

B. Create a new plan named NewPlan that has the maximum number of virtual machines quota set to 75

C. Add NewPlan to the Customer1 user subscription

D. Create a new plan named NewPlan that has the maximum number of virtual machines quota set to 25

E. Update the quota for Microsoft.Compute in Plan1 to have the maximum number of virtual machines set to 75

F. Create a new offer named Offer3 based on Plan1 and create a new user subscription for Customer1 by using Offer3

Question #: 7

Topic #: 1

[All AZ-600 Questions]

You have an Azure Stack Hub integrated system that connects to the Internet.

You are migrating several Hyper-V workloads to Azure Stack Hub. Billing for the workloads is consumption-based.

You need to predict the ongoing Microsoft subscription charges for the workloads.

You run an Azure Migrate assessment and receive the output shown in the following table.

Server name	Cores	Memory (In MB)	OS name	Disk 1 size (In GB)	Network throughput (MB per second)	Disk 1 read ops (operations per second)	Disk 1 write ops (operations per second)
VM001.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	10	200	299
VM002.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	15	200	299
VM003.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	130	200	299
VM004.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	120	200	299
VM005.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	4	200	299
VM006.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	12	200	299
VM007.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	129	200	299
VM008.corp.contoso.com	4	4096	Windows Server 2016 (64-bit)	128	300	200	299
VM009.corp.contoso.com	4	4096	Red Hat Enterprise Linux (RHEL) 7.1	128	8	200	299
VM010.corp.contoso.com	4	4096	Oracle Linux 7	128	100	200	299

The values from which three columns affect the ongoing Microsoft subscription charges? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Disk 1 size (In GB)

B. Network throughput (MB per second)

C. Cores

D. Memory (In MB)

E. Disk 1 read ops (operations per second)

F. Disk 1 write ops (operations per second)

G. OS name

[All AZ-600 Questions]

You have a multitenant Azure Stack Hub integrated system for a Cloud Solution Provider (CSP). The integrated system is used by several customers.

You hire a new support technician to help manage the integrated system.

You need to configure access for the support technician. The solution must meet the following requirements:

☞ The technician must be prevented from accessing customer resources.

☞ The technician must be able to monitor the status of infrastructure backups.

☞ The technician must be able to create and manage plans, offers, and quotas.

Which built-in role should you assign to the support technician?

    A. Reader

    B. Owner

    C. Use Access Administrator

    D. Contributor

    E. Backup Operator

DRAG DROP -

You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com as an identity provider.

You need to ensure that users from an Azure AD tenant named fabrikam.onmicrosoft.com can authenticate to the integrated system.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Import the Directory module	
Download AzureStack-Tools	
From the fabrikam.onmicrosoft.com Azure AD tenant, register the Azure Stack Hub directory	
Configure the contoso.onmicrosoft.com Azure AD tenant to allow sign-ins from fabrikam.onmicrosoft.com	
Generate a service principal for identity synchronization

DRAG DROP -

You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) identity provider.

You have a group named AppGroup1.

You need to provide an application with the ability to access Azure Stack Hub resources by using AppGroup1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

| Sign in to the Azure portal |

| Connect to the administrator portal |

| Add a certificate to an Azure key vault |

| Create an app registration |

| Generate a client secret |

| Create a managed identify |

| Add the app to a group |

DRAG DROP

-

You have a connected Azure Stack Hub integrated system.

You need to create a custom role-based access control (RBAC) role that meets the following requirements:

• Enables users to create, read, update, and delete objects in the Default Provider Sub-scription.
• Prevents users from granting permissions.
• Enables users to revoke permissions.

The solution must minimize administrative effort.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

| Modify the list of Actions. |

| Clone the Reader role. |

| Clone the Contributor role. |

| From the administrator portal in Azure Stack Hub, open the **Access control (IAM)** blade of the Default Provider Subscription. |

| Modify the list of notActions. |

DRAG DROP -

You have an Azure Stack Hub integrated system that is disconnected from the Internet.

You need to collect diagnostic logs, but do not have access to an SMB share.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

| Run the Unlock-SupportSession cmdlet |
| Connect to the privileged endpoint (PEP) |
| From the administrator portal, create an Azure Storage account and a file share |
| Create a shared access signature (SAS) |
| Run the Get-AzureStackLog cmdlet |
| From the administrator portal, create an Azure Storage account and a container |
| Create an app registration |

HOTSPOT -

You have an Azure Stack Hub integrated system that has 10 user subscriptions. Each subscription contains approximately 50 virtual machines.

You are planning a backup and restore strategy for the integrated system.

You need to identify which type of backup to use to back up specific resources.

What should you identify for each resource? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Role-based access control (RBAC) permissions and roles:

▼
Azure Resource Manager template export
Infrastructure backup
Virtual machine backup

Operating system disks:

▼
Azure Resource Manager template export
Infrastructure backup
Virtual machine backup

Storage quotas:

▼
Azure Resource Manager template export
Infrastructure backup
Virtual machine backup
