Auto Business Rule for Assessments , correct is B.

upvoted 1 times

jdaub5287 9 months, 2 weeks ago

Answer is D

Read below for definitions

Create onDemand Assessment

Creates assessments for authorized users after a demand has moved from the submitted state to the screening state.

Update Demand State

Updates the demand state to Qualified after all assessments are completed. For example, Risk must be between 0 and 10 or Strategic Alignment must be between 0 and 10.

Validate Assessment Metrics for Demand

Validates the score values for a demand to be within the maximum and minimum values.

Auto Business Rule for Assessments

Checks if the assessable record exists for the demand and creates an assessable record if none exists.

D is correct

- Assessable Record Check: When a specific event or action occurs, such as the creation of a demand record, ServiceNow checks if an assessable record exists for that demand

- Assessable Record Creation: If no assessable record is found, the "Assessment Creation on Demand" feature automatically generates a new assessable record associated with the demand

 **netvision_g** Most Recent 3 months, 3 weeks ago

Selected Answer: CD

If you are using the Portfolio Workbench for portfolio planning and want to switch to a scenario-based planning, note the following points: After installing Scenario Planning for PPM, remove the Portfolio Workbench module and related link from the Portfolio form. The de-activation of Portfolio Workbench is required to avoid conflicts with two methods of planning and data corruption.

When a time card is approved, the actual time is stored in which two tables? (Choose two.)

- A. Project Time table
- B. Resource Allocation Daily table
- C. Resource Event table
- D. Resource Aggregate tables (Daily, Weekly, and Monthly)

Suggested Answer: *BD*

Community vote distribution

BD (100%)

  **netvision_g** 3 months, 3 weeks ago

Selected Answer: BD

When you approve a time card, the time logged in the time card is saved day-wise in the Time Card Daily [time_card_daily] table. Using daily time logged data, you can generate time card reports by days for any period irrespective of the time sheet period to which the time cards belong. For example, you can create a monthly time card report that includes time cards from the first day to the last day of the month.

Which of the following states appear in the process flow indicator at the top of the Demand form by default? (Choose three.)

- A. Draft
- B. Approved
- C. Updated
- D. Screening
- E. Deferred

Suggested Answer: ABD

Community vote distribution

ABD (100%)

netvision_g 4 months, 2 weeks ago

Selected Answer: ABD

These states appear in the process flow indicator at the top of the Demand form. The process flow indicator:

Highlights the current state of the demand.

Checks off the states that a demand has passed through.

Leaves blank the states that have been skipped.

In this example, the demand is in the Approved state. It passed through the Draft, Submitted, and Qualified states but skipped the Screening state.

Allocated resource plan & Confirmed resource plan are the answers.

upvoted 1 times

🗨️ **sagace77** 9 months, 2 weeks ago

I can't find references to C and D answers in (https://docs.servicenow.com/ja-JP/bundle/sandiego-it-business-management/page/product/resource-management/concept/c_MyCalendar.html).

"Planned" is not a valid state for resource plan.

The only ones valid states in this question are Confirmed and Allocated.

I agree that in confirmed state the entries is created, of course also in allocated (as it is a next state).

However I find in the community someone that confirm that the correct answers are: AC (<https://www.servicenow.com/community/developer-forum/what-creates-calendar-entries-on-a-user-s-individual-calendar/m-p/2607523>).

So, I'm very confused now :-(

upvoted 1 times

🗨️ **dosualdo** 9 months, 1 week ago

I agree that planned is not a valid state, but did you test the calendar with a confirmed resource plan? If so, did it really create entries in the user's calendar?

I tried in my PDI and the calendar entries were created just when the resource plan passed to allocated state.

Where is planned cost calculated from when requesting resources from a group and when resource role is specified?

- A. The task rate cards.
- B. The distribution costs.
- C. The hourly rate of the specified role.
- D. The CI rate cards.

Suggested Answer: C

Community vote distribution

C (83%)

B (17%)

 **netvision_g** 4 months, 1 week ago

Selected Answer: C

Planned cost is rolled up from Requested Allocations for plans in the Planning or Requested state and from Resource allocations for plans in the Confirmed or Allocated state. While requesting resources from a group, if a resource role is specified, the planned cost is calculated from the hourly rate of the specified role.

Source; <https://docs.servicenow.com/bundle/washingtondc-it-business-management/page/product/resource-management/reference/rsrc-plan-form-tabs.html>

upvoted 1 times

 **formacion_teamnow** 7 months, 1 week ago

Selected Answer: C

B is not what we want, we are asked about planned cost on resource request, and distribution of costs is about distributing costs among a group of records. Look for "planned cost" in the table of the article I'm linking

Selected Answer: A

This question is ambiguous. Depending on what you understand on importing "assessment", A and C could be correct. Nonetheless, I think A is a clearer answer, here I have the info <https://www.servicenow.com/community/spm-articles/demand-to-project-conversion/ta-p/2300270>

I cannot find any limit on servicenow documentation, so I can conclude there is no limit. In this article is shown an example with different levels, I suppose one could check on a PDI https://docs.servicenow.com/bundle/washingtondc-it-business-management/page/product/project-management/task/t_AccessTheWBSAsARelatedList.html
