Which of the following are the ways of sending secure e-mail messages over the Internet? Each correct answer represents a complete solution. Choose two.

A. TLS

B. PGP

C. S/MIME

D. IPSec

Correct Answer: *BC*

Community vote distribution

BC (100%)

👤 **tld1486905** 4 months, 3 weeks ago

Selected Answer: BC

PGP – and its more commonly used open-source variation OpenPGP – is an encryption protocol used for sending highly secure end-to-end-encrypted (E2EE) emails.

Secure/Multipurpose Internet Mail Extensions (S/MIME) is a common protocol used to send secure emails with end-to-end-encryption. It is supported by the vast majority of email services and clients.

Question #8

Which of the following recovery plans includes specific strategies and actions to deal with specific variances to assumptions resulting in a particular security problem, emergency, or state of affairs?

- A. Business continuity plan
- B. Disaster recovery plan
- C. Continuity of Operations Plan
- D. Contingency plan

Correct Answer: *D*

Community vote distribution

D (100%)

👤 **tld1486905** 4 months, 3 weeks ago

Selected Answer: D

A contingency plan is the way that your team should react if there is something that interrupts the normal course of business. Contingency plans are often found as part of emergency planning, disaster recovery and risk management.

upvoted 1 times

👤 **Zof21** 1 year, 3 months ago

BCP addresses how to keep the organisation in business after a disaster takes place. It's about the survivability of the org. & ensuring that critical functions can still take place even after a disaster.

Contingency Plansaddress how to deal with small incidents that do not qualify as disasters, as in power failures, a down communication link to the internet, or corruption of software. Contingency Planning Documents help to provide a plan for returning operations to normal in the event of an emergency. Org.'s should be ready to deal with large and small issues, that may occur within one day.

Joseph works as a Software Developer for Web Tech Inc. He wants to protect the algorithms and the techniques of programming that he uses in developing an application. Which of the following laws are used to protect a part of software?

    A. Code Security law

    B. Trademark laws

    C. Copyright laws

    D. Patent laws

Correct Answer: *D*

Community vote distribution

D (100%)

tld1486905 4 months, 3 weeks ago

Selected Answer: D

Patent laws are used to protect the duplication of software. Software patents cover the algorithms and techniques that are used in creating the software. It does not cover the entire program of the software. Patents give the author the right to make and sell his product. The time of the patent of a product is limited though, i.e., the author of the product has the right to use the patent for only a specific length of time. Answer: D is incorrect. Copyright laws protect original works or creations of authorship including literary, dramatic, musical, artistic, and certain other intellectual works.

A contract cannot have provisions for which one of the following?

A. Subcontracting the work

B. Penalties and fines for disclosure of intellectual rights

C. A deadline for the completion of the work

D. Illegal activities

Your company is covered under a liability insurance policy, which provides various liability coverage for information security risks, including any physical damage of assets, hacking attacks, etc. Which of the following risk management techniques is your company using?

A. Risk mitigation

B. Risk transfer

C. Risk acceptance

D. Risk avoidance

Correct Answer: *B*

Community vote distribution

B (100%)

tld1486905 4 months, 2 weeks ago

Selected Answer: B

Risk transfer is a risk management technique that involves transferring future risks from one person to another. Purchasing insurance is a well-known example of risk management since the risk of a person or entity is transferred to a third party (an insurance company).

upvoted 1 times

You work as a security manager for SoftTech Inc. You are conducting a security awareness campaign for your employees. One of the employees of your organization asks you the purpose of the security awareness, training and education program. What will be your answer?

    A. It improves the possibility for career advancement of the IT staff.

    B. It improves the security of vendor relations.

    C. It improves the performance of a company's intranet.

    D. It improves awareness of the need to protect system resources.

Correct Answer: *D*

Community vote distribution

D (100%)

👤 **tld1486905** 4 months, 2 weeks ago

Selected Answer: D

Effective security awareness training focuses on engaging today's workforce to reduce user risk. Many security awareness training programs ignore education best practices, delivering training in one-off sessions that overwhelm users with information or worse, are forgettable. For training to stick, it needs to be persistent, delivered regularly in small doses to fit employees' busy schedules. Most importantly, positive reinforcement and humor performs better than fear-based or boring messaging to improve retention of critical security topics.

A. Financial assessment

B. Asset management

C. Security policy

D. Risk assessment

Correct Answer: *BCD*

Community vote distribution

D (100%)

☐ 👤 **tld1486905** 3 months, 3 weeks ago

Selected Answer: D

ISO/IEC 27002 is an international standard that provides guidance for organizations looking to establish, implement, and improve an Information Security Management System (ISMS) focused on cybersecurity. While ISO/IEC 27001 outlines the requirements for an ISMS, ISO/IEC 27002 offers best practices and control objectives related to key cybersecurity aspects including access control, cryptography, human resource security, and incident response. The standard serves as a practical blueprint for organizations aiming to effectively safeguard their information assets against cyber threats. By following ISO/IEC 27002 guidelines, companies can take a proactive approach to cybersecurity risk management and protect critical information from unauthorized access and loss.

Topic 1

Eric is the project manager of the NQQ Project and has hired the ZAS Corporation to complete part of the project work for Eric's organization. Due to a change request the ZAS Corporation is no longer needed on the project even though they have completed nearly all of the project work. Is Eric's organization liable to pay the ZAS Corporation for the work they have completed so far on the project?

    A. Yes, the ZAS Corporation did not choose to terminate the contract work.

    B. It depends on what the outcome of a lawsuit will determine.

    C. It depends on what the termination clause of the contract stipulates.

    D. No, the ZAS Corporation did not complete all of the work.

Correct Answer: *C*
