DRAG DROP -

A company adds a user to Microsoft 365.

Existing user groups do not have the required permission sets for newly added users.

You need to assign a Dynamics 365 Business Central user group and permissions to the user and the company.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Select and Place:

Actions

Answer area

- Select the user from the user list.
- Select **Get New Users from Microsoft 365 / Update Users from Microsoft 365.**
- Create a user group.
- Assign the user to the company.
- Assign the user group to the user.
- Assign the company to the user.

Suggested Answer:

Actions

Answer area

-
-
-
-
-
- Assign the company to the user.

- Select **Get New Users from Microsoft 365 / Update Users from Microsoft 365.**
- Create a user group.
- Select the user from the user list.
- Assign the user group to the user.
- Assign the user to the company.

Step 1: Select Get New Users from Microsoft 365/ Update Users from Microsoft 365

After you add users or change user information in the Microsoft 365 Admin Center, you can quickly import the user information to Business Central.

Sign in to Business Central using an administrator account.

Choose the Lightbulb that opens the Tell Me feature. icon, enter Users, and then choose the related link.

Choose Update Users from Microsoft 365.

Step 2: Create a user group.

When you create users in Business Central you can assign specific permissions to them through permission sets and organize users in user

groups. User groups make it easier to manage permissions for multiple users at the same time.

Step 3: Select the user from the user list.

Step 4: Assign the user group to the user.

In Business Central you can add users to user groups. This makes it easier to assign the same permission sets to multiple users.

Step 5: Assign the company to the user.

We add the user to the Company role.

Note: After you create users, you must assign security roles for them to use. In the Manage User Roles dialog box, select the security role or roles you want for the user or users, and then choose OK.

BC22.x - Options should be revised as below

Navigate to USERS page

1. Click on the "Update users from Microsoft 365" action from Process menu, once the users added.
2. Click on the "User Groups" from Navigate menu.
3. Create a new User Group, and now you can add Permissions and Members (Users) from this page by clicking on the concerned actions.

Those who don't understand why it cannot be assign user to company, you must try it yourself, there isn't a way.

upvoted 1 times

  **Gabry78** 1 year, 4 months ago

correct is B-C-A-E-F; the image in solution is wrong, but in the solution comment is correct

upvoted 1 times

  **jp81** 1 year, 5 months ago

Last step is incorrect, its "Assign company to the user"

upvoted 1 times

  **NA1926** 1 year, 7 months ago

correct, the last step is wrong

upvoted 1 times

  **mort1616** 1 year, 10 months ago

Surely it make no difference if B or C are first, so long at both are done before A?

I would argue that I know I need a User Group from the question, I can go:

User Groups > Users > Get Users > Select User

or

Users > Get Users > User Groups > Users > Select User

Which is more clicks. Looking for efficiency I would suggest C-B-A-E-F is also valid.

upvoted 1 times

  **MB_Test01** 1 year, 10 months ago

The comment of Rolfemans is right!

upvoted 1 times

  **rolfemans** 1 year, 11 months ago

5th step is indeed incorrect, after step 3 (Select the user from the user list) and step 4 (Assign the User Group to the user) step 5 should be "Assign the Company (Name) to the user". So correct answer/order should be B-C-A-E-F.

upvoted 2 times

  **Bogdan10** 2 years ago

I don't understand the fifth step either. I think we should choose "Assign the company to the user" and not vice versa

upvoted 2 times

  **Kotryna** 2 years, 2 months ago

I don't understand the 5th step. Really, we add customer to the company? I think that we assign company to the user, like the 5th step sounds, but the explanation is opposite.

upvoted 1 times

  **fraxina** 2 years, 2 months ago

Surely you have to assign the user to a company first, before you can assign a user group?

upvoted 1 times

A company uses Dynamics 365 Business Central.

When users create sales documents, the system must display an alert that shows the customer's remaining credit. The alert must also notify the user if the customer has any overdue payments.

You need to configure a credit limit and overdue payment warning.

What should you do?

- A. Configure the Block Customer field.
- B. Configure the Late Payment Predict extension.
- C. Select Both Warnings in the Credit Warnings field.
- D. Enable the Exact Cost Reversing Mandatory field.

Suggested Answer: C

Business Central enables you to determine how you want users to be informed when a customer is over their credit limit. To begin, search for and pull up the

Sales & Receivables Setup. Under the General FastTab, locate 'Credit Warnings.' Within this field, you can determine if you want a notification to display at the top of the Sales Order for:

- (1) Credit Limits
- (2) Overdue Balance
- (3) Credit Limits and Overdue Balance
- (4) No notifications

The screenshot shows the 'Sales & Receivables Setup' page. The 'General' fast tab is selected. The 'Credit Warnings' field is set to 'Both Warnings', which is highlighted with a red arrow. Other fields include 'Discount Posting' (All Discounts), 'Freight G/L Acc. No.', 'Invoice Rounding' (checked), 'Allow Tax Difference' (checked), 'Calc. Inv. Discount' (unchecked), 'Default Item Quantity' (unchecked), 'Tax Bus. Posting Gr. (...)', 'Prepmt. Auto Update...' (Never), 'Create Item from It...' (unchecked), 'Ignore Updated Addr...' (unchecked), 'Copy Customer Nam...' (unchecked), 'Skip Manual Reservat...' (unchecked), and 'Appln. between Curre...' (All).

You configure a cloud-based printer in Dynamics 365 Business Central.
Purchase orders printed by users must automatically print to the cloud-based printer.
You need to create a setup record for the user, report, and printer combination.
On which page should you create the setup record?

- A. Printer Selections
- B. Printer Management
- C. Report Layout Selection
- D. Report Selection and Purchase
- E. Document Sending Profiles

Suggested Answer: A

Yes this is correct, however the Advanced Evaluation is only available if you have a Premium license, or with an Essential license but working in a Sandbox environment.

Advanced Evaluation - Complete Sample Data This creates a company with setup data and complete sample data for all features, including Manufacturing and Service Management.

upvoted 1 times

You are implementing Dynamics 365 Business Central for a customer.

The customer wants to upload starting entries for all master data through a general journal on the last day of the current month.

You need to upload the data according to this requirement.

Which three functions should you select? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Vendors Opening balance
- B. G/L Accounts Opening balance
- C. Calculate Inventory
- D. Get Standard Journals
- E. Customers Opening balance

It's correct

upvoted 1 times

You are setting up and testing a workflow with approval hierarchy in Dynamics 365 Business Central.

In Approval User Setup, you configure the following users:

User	Approval limit	Comments
User1	\$500	
User2	\$1,000	
User3	\$5,000	
User4		User4 is configured as a direct approver for User1.

You create and enable an approval workflow. You configure the workflow to use the approver limit type Approver Chain.

To test the workflow, User1 creates a purchase order for \$1,100 and runs the Send Approval Request function.

You need to identify the actions that occur when the workflow runs.

Which set of actions occurs?

- A. User4 will receive an approval request. Once approved, the purchase order is released.
- B. User3 receives an approval request. Once User3 approves the request, the purchase order is released.
- C. User2 will receive an approval request. Once User2 approves the request, User3 will receive an approval request. Once User2 and User3 approve the request, the purchase order is released.
- D. User1 will receive an approval request. Once User1 approves the request, User2 must approve the request. Once User2 approves the request, User3 must approve the request. Once User3 approves the request, the purchase order is released.
- E. User3 will receive an approval request. Once User3 approves the request, the request is routed to User4 for approval. Once User4 approves the request, the purchase order is released.

Suggested Answer: E

Ksusha9 Highly Voted 3 years, 3 months ago

the correct answer is C.

upvoted 18 times

hp98482 2 years, 7 months ago

How it can be C? Approval Limit of User 2 is \$1000. and Purchase Order created with the amount of \$1100. I have tried the same setup mentioned here and there isn't a correct answer for this question.

upvoted 2 times

kmrrch 1 year, 7 months ago

The approver limit type is Approver Chain. By definition : this option creates approval request entries on all users on the approval hierarchy up to and including the first qualified approver. This will include the approvers which amount of the document requested is beyond their approval limit.

This page explains approver limit types perfectly : <https://ebs.com.au/blog/how-approver-limit-type-works-for-purchase-order-workflows-in-microsoft-dynamics-365>

upvoted 5 times

manipa7el Highly Voted 3 years, 2 months ago

The question states that the workflow is configured using Approver Chain. This rules out answer A. Answer A would be correct if the workflow was configured using Direct Approver. Answer B is describing 'First Qualified Approver' and I rule out Answer E because it goes straight to User3. It cannot be Answer D because User1 submits the PO for approval so User1 is not going to receive an approval request.

upvoted 13 times

Selected Answer: E

correct

upvoted 1 times

🗨️ **Zacroom** 8 months, 3 weeks ago

Answer is E.

Firstly,based on the amt of PO it will need User3's approval. Secondly, with the approval hierarchy set once User3 done it will gose to User4 who is considered as the final approver.

upvoted 1 times

🗨️ **Elynda** 10 months ago

La respuesta correcta es A porque menciona el primer aprobador y ese es el usuario 4

<https://learn.microsoft.com/es-mx/training/modules/create-workflows/2-manual-creation>

upvoted 1 times

🗨️ **TheScience** 1 year, 3 months ago

THE CORRECT ANSWER is C

Setting the Approver Limit Type to Approver Chain routes approval requests to all approvers in the hierarchy even if the request is above their approval limit.

That's also the reason that User 4 doesn't get an approval request, even if he's the direct approver. You would have to set the Approver Limit Type to Direct Approver instead of Approver Chain.

upvoted 1 times

🗨️ **Elmar31** 1 year, 3 months ago

Selected Answer: E

the correct answer is E

reason:

we need to follow the chain.

user 2 has the allowance to confirm 1000 USD the amount that needs to be confirmed is 1100 USD hence he will not be asked as he cannot confirm anyways.

user 3 is has rights to confirm and once he did the next person is user 4 that needs to confirm. The reason that it doesnt end with User 3 is the same reason why it doesnt jump to user 4 for confirmation. the confirmation is set to the chain. Hence First 3 needs to confirm and as 4 needs to confirm anything 1 did 4 needs to confirm after that.

upvoted 4 times

DRAG DROP -

A company implements Dynamics 365 Business Central.

The database contains very few posted entries. You observe that Global Dimension 1 is configured incorrectly.

You need to run the Change Global Dimensions function in Sequential mode to replace Global Dimension 1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Sign out of Business Central, and then sign back in.

Select the new dimension.

Open **General Ledger Setup**.

Select the **Change Global Dimensions** action.

Select the **Start** action.

Select the **Prepare** action.

Answer Area

Suggested Answer:

Actions

Sign out of Business Central, and then sign back in.

Select the new dimension.

Open **General Ledger Setup**.

Select the **Change Global Dimensions** action.

Select the **Start** action.

Select the **Prepare** action.

Answer Area

Select the **Change Global Dimensions** action.

Select the new dimension.

Select the **Start** action.

Sign out of Business Central, and then sign back in.

Reference:

<https://docs.microsoft.com/en-gb/dynamics365/business-central/finance-dimensions>

 **ask1234e** Highly Voted 3 years, 4 months ago

I think it should be:

open general ledger setup

change global dimension

select a new dimension

Click "start"

upvoted 76 times

 **imortel** 2 years, 4 months ago

That is correct.

upvoted 3 times

 **lbernad** 3 years, 4 months ago

upvoted 5 times

 **daniza87** 3 years ago

I think the same too

upvoted 2 times

 **sunnybb269** Highly Voted 3 years, 4 months ago

1. General Ledger Set
2. Change Global Dimensions
3. New Dimensions
4. In this case study (Start) because it is Sequential
5. Sign out and sign in to Business central

<https://docs.microsoft.com/en-gb/dynamics365/business-central/finance-dimensions#to-set-up-global-and-shortcut-dimensions>
upvoted 12 times

🗨️ 👤 **42f9d8d** 2 months, 2 weeks ago

The question is: Which "four" actions... so this solution isn't possible. YOU also don't need to sign in and out, because it is Sequential, like you said.

upvoted 1 times

🗨️ 👤 **GuriKaur** 3 years, 2 months ago

Exactly but don't know why they didn't include General ledger setup as First sequence step

upvoted 1 times

🗨️ 👤 **manipa7el** 3 years, 2 months ago

Sign out and sign in to Business Central is not necessary for Sequential. It's only required for Parallel, because you perform the Start action after you sign back in - <https://docs.microsoft.com/en-gb/dynamics365/business-central/finance-dimensions>

upvoted 6 times

🗨️ 👤 **Savvytech** Most Recent 2 months, 3 weeks ago

in the question, it starts with to "Run the change global dimensions" so this means general ledger setup is already open.

upvoted 1 times

🗨️ 👤 **Freddy_R** 11 months, 1 week ago

Correct C,D,B,E

upvoted 3 times

🗨️ 👤 **khomotsophy** 1 year, 1 month ago

so basically this solution is wrong

upvoted 1 times

🗨️ 👤 **IJH** 1 year, 2 months ago

"Sign out" and "prepare" options are only necessary for Parallel processing. In this case because there are only a few transactions Sequential is the correct option.

1. open the G/L Setup
2. Click 'Change Global Dimension'
3. Select the new dimension
4. Click 'Start'

upvoted 2 times

the question is: which "four" actions, not six

upvoted 1 times

🗨️ 👤 **SHKhan** 1 year, 12 months ago

Here is the correct link to change Global Dimension steps,

Correct Sequence would be

Open General Ledger Setup

Select Change Global Dimension action

Select the new Dimension

Select Start Action.

<https://learn.microsoft.com/en-gb/dynamics365/business-central/finance-dimensions#to-change-global-dimensions>

upvoted 5 times

🗨️ 👤 **Charisty** 2 years, 2 months ago

Open General Ledger Setup first

upvoted 1 times

🗨️ 👤 **ESP2020** 2 years, 10 months ago

The correct answer is_

1. Open general ledger setup

2. Select change global dimension

3. Select a new dimension

4. Select start.

upvoted 7 times

🗨️ 👤 **SuzieQ** 3 years, 4 months ago

Open General Ledger Setup is a valid step as well. Why is it not a correct first answer?? I also believe the Sign out step is necessary for the Prepare Action, not the Start action.

upvoted 2 times

🗨️ 👤 **VLoveira** 3 years, 4 months ago

G/L setup

Change Global Dimension

Sign Out/Sign In

Click Start

A company uses Dynamics 365 Business Central to record payments for vendors. All payment records include similar data elements. You are onboarding a new vendor. You must create a unique number series for payments from the vendor. No other vendors will use the new number series.

You need to configure the system.

What should you use?

- A. Vendors
- B. General Journals
- C. General Journal template
- D. Payment journals
- E. Workflow

Suggested Answer: B

You create a numbering system in general journals.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/business-central/ui-create-number-series>

Community vote distribution

Cliffdani Highly Voted 2 years, 2 months ago

I think you do the configuration in General Journal template
upvoted 15 times

Correct answer is C
upvoted 1 times

elberkaoui 11 months ago

Selected Answer: C

I think the question is a bit vague or poorly rephrased. However, if I have to choose, I would follow best practices and perform the configuration at the general journal template level by creating a new batch (Payments Journal)."
upvoted 3 times

IJH 1 year, 2 months ago

It is a very badly worded question. You could create a new template with a no. series for this specific vendor but the easiest way to do this would be to open General Journals and create a new batch for the vendor and selecting the no. series. You can then go ahead and create the journal lines using that batch.
upvoted 2 times

Nereluli 1 year, 6 months ago

c is correct
upvoted 2 times

ivanrlg 1 year, 6 months ago

Selected Answer: C

C. General Journal Template

The General Journal Templates in Dynamics 365 Business Central allow you to predefine certain settings that will be used when creating new journal lines, including a unique number series.

upvoted 1 times

NA1926 1 year, 7 months ago

Selected Answer: B

correct

upvoted 1 times

🗨️ **Kindo** 1 year, 7 months ago

Selected Answer: C

General Journal Template is the place where you can create a new journal template for the vendor, then select type, for example - "Payment" and then assign "No. Series". When now users open a Vendor Payment Journal a list with available templates will be shown first. I think this is the way I would do it.

upvoted 1 times

🗨️ **zubokvv** 1 year, 8 months ago

Selected Answer: D

Since we are dealing with payments, we can set up new batch for vendor with unique number series using Payment Journal. It uses Gen. Journal Batches but is the closest to the topic.

upvoted 2 times

🗨️ **OTETS** 1 year, 9 months ago

Selected Answer: C

You can only define a new No. Series on the template page, since this is specifically requested C is the only correct answer

upvoted 3 times

🗨️ **r44712** 1 year, 9 months ago

Selected Answer: B

It can't be at Template level, it would affect all Batches to which it relates. If you do it at Batch level, then you could create a specific Batch for the vendor.

What I don't understand is why the question is worded "Genral Journal" and not "General Journal Batch".

upvoted 1 times

🗨️ **Lavoisier** 1 year, 9 months ago

Do we have No series in Journal ? I don't think so. The question is asking for a new number series for the vendor.

upvoted 1 times

🗨️ **Kelvin97** 1 year, 10 months ago

general journals

upvoted 1 times

🗨️ **San4Nav** 1 year, 11 months ago

for Payment from vendor, we need to pass the JV and it's possible through General Journal. Therefore answer is B

upvoted 1 times

🗨️ **SHKhan** 1 year, 12 months ago

B is Correct answer. In General Journal Template at Payment template with source code Payment Journal click on Batches this will open General Journal batches and set the number series and account type Vendor and account number set to a specific vendor from the list which will fulfil the requirement mentioned in question.

upvoted 1 times

🗨️ **kaifree** 2 years, 1 month ago

Selected Answer: C

Usually numbering sequences are defined in the General Journal template for each vendor.

General Journal Setup => Batches => Post No. Series

upvoted 1 times

🗨️ **eluchev** 2 years, 2 months ago

Selected Answer: D

The question is worded incorrectly as you usually don't receive payments from vendors but you pay your vendors. Assuming we need a different numbering sequences for payments "to" vendors the correct function and place where to set it up is the payment journal

upvoted 2 times

🗨️ **SHKhan** 1 year, 12 months ago

There is nothing mentioned about receive payment from vendor, question is asking to record a payment for vendor. Please read the question again.

upvoted 1 times

🗨️ **flaxaz** 1 year, 8 months ago

elucheb is right about the wrong formulation of the question as it says "You must create a unique number series for payments FROM the vendor."

upvoted 1 times

DRAG DROP -

A company is implementing Dynamics 365 Business Central.

You need to create a new company that is configured similarly to an existing company. The existing company has data that must be used as a template for the new company.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Tools	Requirement	Tool
Assisted Setup	Create the first essential data components of a company, such as the company name.	
RapidStart Services	Run a series of setup tasks in a specific order and manually mark the tasks as completed once the tasks are finished.	
Configuration Questionnaire	Template the existing data and apply the template to the new company in a single process.	

Suggested Answer:

Answer Area

Tools	Requirement	Tool
Assisted Setup	Create the first essential data components of a company, such as the company name.	Assisted Setup
RapidStart Services	Run a series of setup tasks in a specific order and manually mark the tasks as completed once the tasks are finished.	Configuration Questionnaire
Configuration Questionnaire	Template the existing data and apply the template to the new company in a single process.	RapidStart Services

You are implementing Dynamics 365 Business Central. You create a role center page for all users.

Users must not be allowed to personalize the page.

You need to configure the system.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. On the Profiles (Role) page, select the profile and select the User as the default profile option.
- B. On the User card, set the status to Disabled.
- C. On the Profiles (Role) page, select the profile and select the Show in Role Explorer column.
- D. On the Profiles (Role) page, select Enable the profile. Disable all other profiles.
- E. On the Profiles (Role) page, select the profile and select the Disable Personalization option.

Suggested Answer: ACE

A,C SET TO DEFAULT PROFILE,Show in role explorer

upvoted 1 times

 **hunkyheap** 1 year, 11 months ago

ACE is correct. But answer A should say open certain Profile (Role) "CARD" and enable "Use as default profile" toggle which means all users are assigned to this profile.

upvoted 3 times

  **eluchev** 2 years, 2 months ago

Selected Answer: ACE

ACE is actually correct (other than the typo of User default profile instead of Use as default profile). A is correct because when a new Profile is created the Enabled flag is ticked by default so no need to tick it specifically. D is incorrect because the question doesn't state that all other profiles should be disabled

upvoted 3 times

  **jakexmueller** 2 years, 2 months ago

CDE should be correct. Bold of this website to ask for money with so many errors

upvoted 1 times

  **SHKhan** 2 years ago

how can D is correct? there is no requirement to disable all profiles in the question.

upvoted 2 times

  **SHKhan** 2 years ago

Correct answers are ACE.

upvoted 2 times

  **Lorot** 2 years, 2 months ago

Selected Answer: CDE

D is necessary. A is not necessary.

A is anyway wrong because it's named "Use as default profile" and not "User as default profile".

upvoted 3 times

  **SHKhan** 2 years ago

Why D is necessary, please read the question there is no requirement mentioned to disable all profiles. D is wrong answer. Correct answers are ACE.

upvoted 2 times

You are implementing Dynamics 365 Business Central Online for a company. The company is migrating from a previous version of Business Central.

The company wants to migrate historical financial information from the previous fiscal year into the new database, including all analytical information.

You need to migrate data, including analytical information, by using a configuration package.

Which three steps should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a configuration package. Then select the appropriate table.
- B. Export the table from the configuration package to Microsoft Excel. Adjust the file to include dimension information. Import the updated Excel table.
- C. Select the Dimensions as Columns field. Include all the dimension fields in the configuration package.
- D. Export the configuration package.
- E. Assign a data template to the configuration package.

Suggested Answer: ADE

Community vote distribution

MB_Test01 Highly Voted 1 year, 10 months ago

The Correct answer is ACD. E es invalid, don't need do that and B, we don't have to manipulate the data.

upvoted 1 times

IJH 1 year, 2 months ago

You don't need to make assumptions, ACD is the correct answer
A. You need to create a config Package and select the table required
C. You need to set dimensions as columns to bring in the analytical data as stated in the question
D. You need to export the data to Excel for importing into the new database.
upvoted 3 times

Elmar31 1 year, 4 months ago

I beleive this is correct reason: There is one important assumption. The actions taken are in the old system. We are preparing the data to be moved to the new system.
A. we need a configuration package hence we need to create one. We need to select what data we want to take with us to the new system.
D. export the configuration package in order to apply it later in the new system.
E. assign a template. As the new system can potentially be setup differently a template is needed to make sure the date will be readable in the new system.

If we assume that we are already on the new system then there are nothing we need to do. The data must have been migrated already as the answers provided dont give options to integrate a already created pacakge into the DBs

In regards to B. I build a package and added revenue tables to it. When clicking on display dimesnions in collums I received a error message. Hence I dont beleive this option ot be right in this case.

Selected Answer: ABC

creo que es abc

upvoted 1 times

🗨️ 👤 **ivanrlg** 1 year, 6 months ago

Selected Answer: ABC

The correct answers are A, B, and C.

A. Create a configuration package. Then select the appropriate table. This will create a new configuration package and select the table that you want to migrate data from.

B. Export the table from the configuration package to Microsoft Excel. Adjust the file to include dimension information. Import the updated Excel table. This will export the table to Excel, allow you to add dimension information, and then import the updated table back into Business Central.

C. Select the Dimensions as Columns field. Include all the dimension fields in the configuration package. This will include all the dimension fields in the configuration package, which will allow you to migrate all the analytical information.

upvoted 3 times

🗨️ 👤 **lagetronix** 1 year, 6 months ago

ADE is correct. if you are migrating you need to select data template,

upvoted 2 times

🗨️ 👤 **Kindo** 1 year, 7 months ago

Selected Answer: ABC

I think B is necessary in this case. Why? Because you can only export Dimensions (analytical information). You cannot import them back (except Fields Dimension Set ID, Shortcut Dimension 1 and Shortcut Dimension 2) regardles if you import configuration package or excel. So if you want to import additional dimensions that are not stored as Fields on the particular table, you have to manipulate the Excel File (answear B). Additionally you have to change Global Dimensions before you import the file so as to be able to import selected Dimensions in the Fields Shortcut Dimension 1 and 2.

🗨️ 👤 **jakexmueller** 2 years, 2 months ago

Another question with errors?

upvoted 1 times

🗨️ 👤 **Cal214** 2 years, 2 months ago

Personally, I think this is ACD

upvoted 5 times

🗨️ 👤 **Dynamics_Inspire** 2 years, 1 month ago

D is to export the package. you can not import information through a package file. So D is not an option here. you have to import the information using excel. Analytics information means dimension.

upvoted 2 times

🗨️ 👤 **Lavoisier** 1 year, 10 months ago

If you export a package, you will export it with data in the related tables... Then, i think the answer is ACD. B is not relavant, because we dont have to ajust the file and include dimension information. (The question does not state that...)

upvoted 1 times

☒  **TWH** 2 years, 2 months ago

Selected Answer: ABC

ACB Surely ?

upvoted 4 times

☒  **Lavoisier** 1 year, 10 months ago

B is not relevant. No need to ajust dimension information...

upvoted 2 times

You are configuring Dynamics 365 Business Central. You have a file containing balances for all general ledger accounts as of December 31, 2018.

You import the data into a General Journal batch. You enable the Force Doc. Balance option for the template.

When you attempt to post the batch, the following error message displays:

Out of balance -

You need to resolve the error.

Which three actions should you perform? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

- A. Ensure that the set of journal entry lines balance by posting date.
- B. Ensure that the set of journal entry lines balance by gen. posting type.
- C. Ensure that the set of journal entry lines balance by amount.
- D. Ensure that the set of journal entry lines balance by document no.
- E. Ensure that the set of journal entry lines balance by dimension set ID.

-
- Update users from Microsoft 365.
-
-
- Select New on the Users page from Dynamics 365 Business Central.

-
- Apply indirect permissions to a user.
-
-
- Apply effective permissions to a user.
-
-
- Assign user to a User Group.

Box 1: Update users from Microsoft 365

To add users or update user information and license assignments in Business Central

After you add users or change user information in the Microsoft 365 Admin Center, you can quickly import the user information to Business Central. The import includes license assignments.

1. Sign in to Business Central using an administrator account.
2. Choose the Lightbulb that opens the Tell Me feature. icon, enter Users, and then choose the related link.
3. Choose Update Users from Microsoft 365.

For new users, the next step is to assign user groups and permissions.

Box 2: Assign user to a User group.

HOTSPOT -

A company uses Dynamics 365 Business Central.

You need to customize sales invoice printouts to meet the following requirements:

- ⇒ Display the customer city and then the postal code.
- ⇒ Display the company logo to the right of the customer address information.

Where should you make the configuration change? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Display the customer city and then the postal code.

Location

Location Code in Company Information page
Local Address Format in General Ledger Setup page
Local Cont. Addr. Format in General Ledger Setup page
Require County/Region Code in Address in General Ledger Setup page

Display the company logo to the right of the customer address information.

Company Information page
General Ledger Setup page
Sales & Receivables Setup page
Purchases & Payables Setup page

Suggested Answer:

Answer Area

Requirement

Display the customer city and then the postal code.

Location

Location Code in Company Information page
Local Address Format in General Ledger Setup page
Local Cont. Addr. Format in General Ledger Setup page
Require County/Region Code in Address in General Ledger Setup page

Display the company logo to the right of the customer address information.

Company Information page
General Ledger Setup page
Sales & Receivables Setup page
Purchases & Payables Setup page

Box 1: Local Address Format in General Ledger Setup page

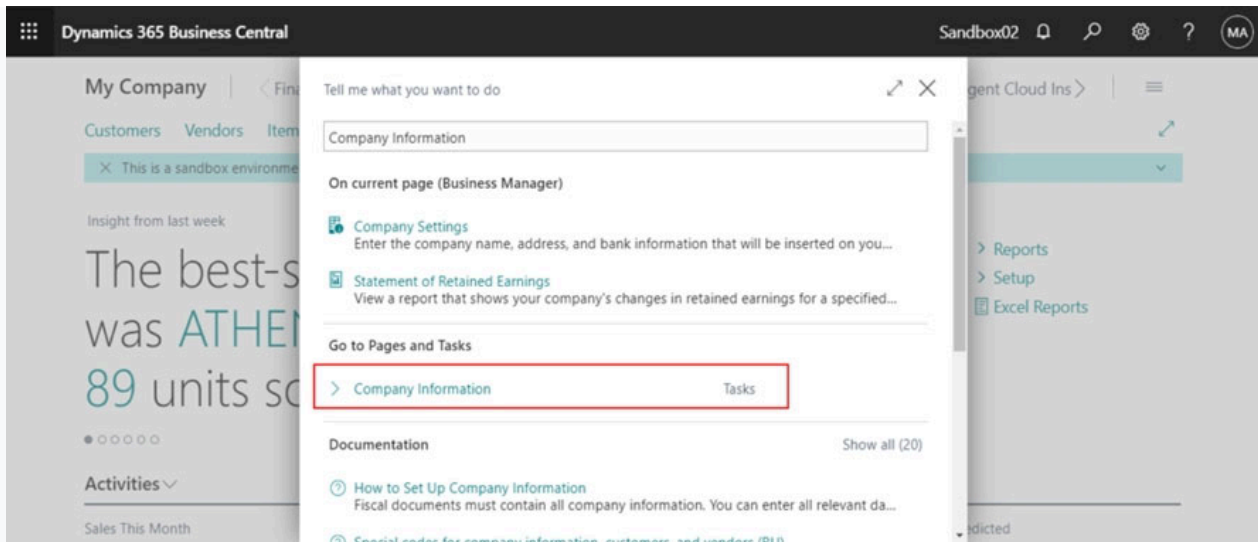

Local Address Format: Here you can specify the format in which addresses must appear on printouts. ie, Post Code+City, City+Post Code, City+County+Post Code, Blank Line+Post Code+City,formats.

Note: The General Ledger Setup page specifies how you handle many different accounting issues in your company. For example, you use this page to specify invoice rounding details, the currency code for your local currency, address formats, and whether you want to use an additional reporting currency.

Box 2: Company information page -

Company Logo in Business Central

Enter Company Information in Tell me, and then choose the related link.

Then you can find a setting of the Company Logo on the Company Information page.

Picture: Specifies the picture that has been set up for the company, such as a company logo.

DRAG DROP -

A company uses Dynamics 365 Business Central. You assign a purchasing profile to all users in the purchasing department. A user moves from the purchasing department to another department.

You need to remove all personalizations in the user's profile.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Select the line for the page personalization that you want to delete and then select the Delete action.
- Select User Settings and then select the related link.
- Navigate to the User Page Personalizations page.
- Open the User Settings card.
- Select Clear Personalized Pages.

Answer area

Suggested Answer:

Actions

- Select the line for the page personalization that you want to delete and then select the Delete action.
-
-
- Open the User Settings card.
-

Answer area

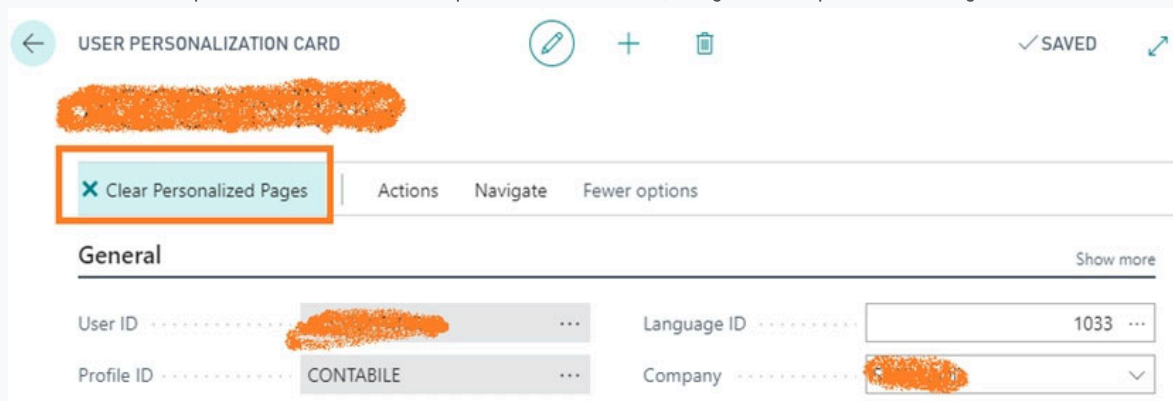

- Select User Settings and then select the related link.
- Navigate to the User Page Personalizations page.
- Select Clear Personalized Pages.

Step 1: Select User Settings and the select the related link.

Select the line for the profile that you want to change user settings for, and then choose the User Personalizations List action.

Step 2: Navigate to the User Page Personalization page

You can delete user personalization from a user personalization card, using the Clear personalized Pages Action.

Step 3: Select Clear Personalized Pages

Trigger					

Box 1: Business Central workflows

Change management introduces a managed workflow that makes sure that purchase orders are locked when they have been approved. The purchase orders cannot be changed until you start the change request workflow.

Note: A workflow represents a business process. It defines how a document flows through the system and indicates who must complete a task or approve a document.

Box 2: Then Response -

Box 3: When Event -

The workflow is divided into three sections:

1. When Event This is where the trigger is selected. Examples of trigger could be:

A master data record is changed -

A journal line is created -

an Incoming document is created or released

Approval of a document is requested

2. On Condition of - The conditions are related to the event and opens for creating filters for when the event is triggered

3. Then Response - The Responses responds to what the next step in the work are.

A company uses Dynamics 365 Business Central. You grant the financial bookkeeper the D365 ACCOUNTANTS permission set.

An auditor plans to perform an annual accounting audit. The auditor must have access to the same data as the bookkeeper but with view-only permission.

You need to create the permission set for the auditor.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
On the User Groups page select the D365 ACCOUNTANTS code.	
Edit the permissions for Permission Set AUDIT.	
Assign a New Permission Set name to AUDIT.	
On the Permission Sets page select the D365 ACCOUNTANTS permission set.	
Set the Insert, Modify, and Delete permissions to No for all permission lines.	
Use the Copy Permission Sets function.	

Suggested Answer:

Answer area
On the User Groups page select the D365 ACCOUNTANTS code.
On the Permission Sets page select the D365 ACCOUNTANTS permission set.
Use the Copy Permission Sets function.
Assign a New Permission Set name to AUDIT.
Edit the permissions for Permission Set AUDIT.
Set the Insert, Modify, and Delete permissions to No for all permission lines.

 **python123** 2 months, 1 week ago

I agree the answer:

1. On the user groups page select the D365 ACCOUNTANTS code
2. On the permission sets page select the D365 ACCOUNTANTS permission set
3. Use the copy permission sets function
4. Assign a New Permission set name to AUDIT
5. Edit the permissions for Permission Set AUDIT.
6. Set the Insert, Modify, and Delete permission to NO for all permission lines.

HOTSPOT

A company uses Dynamics 365 Business Central. There are three departments (ADM, PROD and SALES) that are set up as dimensions.

A customer wants to speed up the purchase invoice entry process for building materials by having the AP clerks fill purchase invoices without using dimensions. Monthly building expenses can vary between \$5,000-\$7,000 per month. The allocation of building expenses is as follows:

Department	Allocation
PROD	50 percent
SALES	25 percent
ADM	25 percent

Allocation of the monthly building expense between dimensions is required at the end of each month.

You need to configure the system to automatically allocate building expense total balances each month between dimensions.

How should you configure recurring general journals? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution component
Select recurring method	<input type="text"/> <ul style="list-style-type: none"> F Fixed V Variable RF Reversing Fixed BD Balance by Dimension
Set up recurring frequency	<input type="text"/> <ul style="list-style-type: none"> 1M 1D CM-1D 1D+1M-1D
Set up amount field	<input type="text"/> <ul style="list-style-type: none"> \$5,000 0 -\$5,000 \$7,000

alsa23 **Highly Voted** 1 year, 4 months ago

1- BD

2- CM-1D

3- 0

upvoted 7 times

e9c920e **Most Recent** 5 months, 1 week ago

1D+1M-1D is the actual date one month later. Not the end of the current month.

The correct answer would only be CM. CM-1D is the closest to the truth.

upvoted 2 times

Elmar31 1 year, 4 months ago

the second question and here the answers are having issues.

We need to have the recurring event at the end of the month.

the options here would either be

CM-1D (one day before the end of month)

or 1D+1M-1D

CM would in my opinion be the correct answer as it is defined as end of this month the -1D might be to pay on time? not sure CM -1D seems to be the most close to a correct answer.

D1+M1-D1 is in one month from now do whatever event this needs to trigger. Hence if you setup the first payment on the last day of the first month this scheme needs to start this might work. M is smart enough to adjust to different month lengths. Why there is the idea that +1D -1D is needed? no clue.

The question seems unclear with the possible answers provided.

upvoted 1 times

Nereluli 1 year, 6 months ago

lejnus voto

upvoted 1 times

Lejnus 1 year, 6 months ago

Recurring frequency

1D+1M-1D works only if you set this up/post the first time on the last day of the month, meaning that the next one will be correct.

1M is one month, regardless of how many days are in a month

CM-1D means the date before the day of the last month.

1M+CM is the correct answer (which isn't an option) if you want this to work without having to start the process in the last days of the month for the first time.

I think this is a bit unclear, either the question or the answers need to be clarified

upvoted 3 times

Djanck 1 year, 7 months ago

The recurring frequency values seem wrong... "The end of the month" could have been either:

* D1+1M+D1

* CM

Here is a list of date formula values → [Discuss!](#)

<https://community.dynamics.com/business/b/that-nav-guy/posts/date-formula-in-business-central>

upvoted 3 times

Djanck 1 year, 7 months ago

D1+1M-D1, I meant.

upvoted 2 times

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring default reports and layouts in Dynamics 365 Business Central.

You must add new data items to the report and change the layout associated with the default Purchase Order report.

A developer creates and deploys a new report object that includes the new data items and layout.

You need to configure Business Central to use the new report object as the system default when printing purchase orders.

Solution: On the Report Layout Selection page, select the new report object. Update the value to Custom Layout and select the updated layout.

Does the solution meet the goal?

A. Yes

B. No

Suggested Answer: B

Community vote distribution

e9c920e 5 months, 1 week ago

Selected Answer: B

The report selection is needed, not the layout selection.

upvoted 1 times

Elmar31 1 year, 4 months ago

Selected Answer: A

I just tested it in my system used 1306 as the test report.

changed the rdlic report to word report selected the new report and with that any times 1306 was printed after that it was my new report.

It is a custom report but it now runs as the default report. Hence from a working standpoint this will work as anyone printing 1306 will use the new report. Why is this then No and so many people agree with this ?

upvoted 1 times

lagetronix 1 year, 3 months ago

The developer created a new report object and not purchase order that is why it is NO

upvoted 1 times

ivanrlg 1 year, 6 months ago

Selected Answer: B

The answer is No.

The solution does not meet the goal because it does not update the Report Selections. To set a custom report as the default for printing purchase orders, you need to update the Report Selections.

upvoted 2 times

Elmar31 1 year, 5 months ago

we are talking about "Report Selections" if searched in BC right? What would happen if report selections was to be empty ? As the setup I have here has only options in the report selection (task) that are not related to purchase orders at all. And adjusting the report in the report

layout selection then works for me. The new layout will then be used. Is it correct to assume that if there is no Report Selection task that selects a different report the answer would be yes? Or is there something else in my setup that will most likely create that result?

Elmar31 Highly Voted 1 year, 5 months ago

answer is correct

reason:

the really important part of the text is "accrual basis for accounting" that is not done in the banking account balacing. Bank account only gets involved AFTER the accrual account has been done. And that is done in the G/L.

The only question is why anyone would use this type of accounting for day to day money business transactions.

upvoted 14 times

alsa23 1 year, 4 months ago

I agree with this statement

upvoted 2 times

rolfilemans Highly Voted 1 year, 8 months ago

Surely you should select Bank Account under Bal. Account Type, or am i crazy?

upvoted 10 times

🗨️ 👤 **adriankohws** Most Recent 5 months, 3 weeks ago

The point is, if I wish not to pay my vendor and make accruals, I understand, what the question meant by accruals on receipts? So I credit my customer, I debit G/L account to Accruals? Accruals from customer, than I just didn't receive payment, what is the difference for the figure to sit inside Trade Debtors and Accruals(with Debit Balance)???

Bank Account under Bal. Account Type

upvoted 4 times

A company is using Dynamics 365 Business Central. The finance manager creates a new general ledger (G/L) account.

You need to configure the system to include the G/L account in the general journal reconciliation window.

What should you do?

- A. Add this G/L account to the Bank Account Posting Group.
- B. Enable the Direct Posting field in the G/L account card.
- C. Enable the Reconciliation Account field in the G/L account card.
- D. Create a new payment reconciliation journal.

You are a functional consultant configuring items in Dynamics 365 Business Central.

You are configuring multiple units of measure for an item that has a base unit of measure of PCS and an additional unit of measure of BOX. One BOX holds 20 PCS of an item.

You need to define the relationship between the units of measure.

Which value should you populate on the Item Units of Measure page for the item?

- A. For the BOX unit of measure, set the Qty. per Unit of Measure to 0.05.
- B. For the BOX unit of measure, set the Qty. per Unit of Measure to 20.
- C. For the PCS unit of measure, set the Qty. per Unit of Measure to 0.05.
- D. For the PCS unit of measure, set the Qty. per Unit of Measure to 20.

 **Nereluli** 1 year, 6 months ago

Selected Answer: B

la b es correcta
upvoted 2 times

 **ivanrlg** 1 year, 6 months ago

Selected Answer: B

The correct answer is B.

The Qty. per Unit of Measure field helps calculate the quantity in the base unit of measure. In this case, the base unit of measure is PCS and the additional unit of measure is BOX. One BOX holds 20 PCS of an item. Therefore, the Qty. per Unit of Measure for the BOX unit of measure should be set to 20.

This means that when you enter a quantity of 1 BOX, the system will automatically calculate the quantity in PCS as 20.

 **Nereluli** 1 year, 6 months ago

Selected Answer: CE
c y e es correcto
upvoted 1 times

 **ivanrlg** 1 year, 6 months ago

Selected Answer: CE
The correct answers are C and E.

The purchase price of an item can be configured on the Item card or on the Vendor card.

On the Item card, you can set the purchase price for all vendors. On the Vendor card, you can set a specific purchase price for a particular vendor.

If you set a purchase price on the Vendor card, that price will override the purchase price on the Item card for that vendor.

The purchase price cannot be configured on the Purchase order, Resource prices, or Customer card.

Case study

-

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

-

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

-

Northwind Traders is an independent, family-owned business. The company distributes natural pet products in the Northwest region of the country/region. Products are purchased directly from manufacturers and distributed by using its own fleet of trucks.

When the company started, deliveries were within a three-hour radius of the warehouse. Due to regional growth, current deliveries require drivers to stay overnight on some routes. The company plans to open a second warehouse to expand the region and eliminate overnights for route drivers. The company also plans to hire a second group of employees to run operations in this new location. The finance and accounting teams will remain in the original location.

The company uses a third-party system for financials and order management. The finance department stated that the company's fiscal year begins on July 1 and ends on June 30. The mm/dd/yyyy date format is used.

As part of the expansion, the owner plans to upgrade to an ERP system and use Business Central to fulfill the company requirements and manage growth.

Current environment

-

Orders

-

- Orders are emailed to customer service and manually keyed into the inventory system.

Pricing and discounts

-
- Customer pricing is determined by the customer market type. Customer market types are Retail, Veterinarian, and Breeder. Each customer is associated with only one market type.
- Vendors offer monthly promotions to customers by item, brand, or item category.
- Invoices should show each customer's base price, the discount amount, and the net price.

Accounts payable

-
- The company wants to expand vendor payment options in the new system.

Requirement

-

Customers

-
- The sales team must be able to do the following:
 - o Quickly set up new customers with the proper settings based on customer type.
 - o Identify customers by market type. Customer posting groups will be used to identify which market the customer belongs to.
- Base price is determined by the customer market type.
- The sales department should receive a warning when entering the order if a customer is over their credit limit.

Sales

-
- Customer discounts are offered for specific time frames by item, brand, or product category. Discounts should be added to sales lines automatically.
- Discounts must post to a unique general ledger (G/L) account.
- The business needs to be able to track revenue by location, market, and product category dimensions. Locations 100 and 200 will be set as default dimensions on the two warehouse locations. Food, treats, toys, and supplies are the required product categories, which will be set as default dimensions on the item cards. Each customer card will have a default market dimension.
- The sales manager wants to delete canceled orders and automatically archive them.

Warehouse

-
- Orders will be fulfilled from two possible warehouse locations.
- Product will be transferred between locations by using transfer orders.

Sales invoices

-
- Invoices will be posted after delivery.
- Invoices will be emailed to the customer.
- The sales department must be able to quickly correct posted invoices for the following scenarios:
 - o Posted invoices that have not been paid.
 - o Posted invoices that have been paid.
 - o Posted invoices created from sales orders.
 - o Posted invoices not created from sales orders.

Accounting

-
- The finance department requires that the company has 12 monthly accounting periods per fiscal year.
- Finance department users must be able to reconcile the accounts receivable (AR) subledger to the G/L account at month end.
- AR department users need the ability to settle and close invoices when customers take payment discounts after the payment discount date

has passed. AR users should be allowed to accept or reject the payment tolerance.

- Accounts payable (AP) department users must be able to pay vendors by electronic funds transfer (EFT) and use a payment journal batch named EFT to process payments.
- When viewing G/L entries, the finance and accounting teams must be able to see debits and credits instead of a positive or negative amount.
- The company needs to be able to track expenses by department and location. The departments are sales, operations, and administration.
- AR must be able to correct cash application entries.

Issues

-

Payment application

-

- Customers may have several stores that are responsible for their own orders and payments.
- Occasionally, AR clerks mistakenly apply payments to the incorrect customer invoice.

Invoicing

-

- When items are delivered, customers refuse the items for reasons such as damaged or wrong item.
- After the invoices are posted, they must be corrected, which is time-consuming.

Warehouse

-

- The sales department and warehouse managers must have visibility into products that are in the process of being transferred between locations.

Accounts

-

- Customer accounts are difficult to view by market type.
- The finance team does not have the ability to report revenue by customer type.

Accounting

-

- AR users often find variances between the AR subledger and G/L account.
- Customers often take the payment discount after the payment discount date has passed, leaving open invoices for small amounts.
- The AP department is unable to pay vendors by EFT in the current system.
- Finance and accounting team members have trouble validating postings when they use only the amounts field on G/L entries.
- The finance department is unable to run financial reports by market. All revenue postings must reference a market.

You need to configure retail store customer cards to track revenue by market.

Which configuration should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

You are configuring Dynamics 365 Business Central security settings.

You assign the following permission sets to a user:

Permission set	Object type	Object ID	Insert permission
CustomerMgmt	Table data	18 (Customer)	Yes
ReceivablesMgmt	Table data	18 (Customer)	Blank

You need to determine how the system handles the user's permissions.

What is the outcome of the user permission configuration?

- A. The Yes option will allow a user to create a new customer.
- B. The permission set order will allow a user to create a new customer.
- C. The Blank option will allow a user to create a new customer.

Suggested Answer: A

DRAG DROP

-

A manufacturer uses Dynamics 365 Business Central.

The company has the following item types:

- Raw Materials
- Work-in-progress (WIP)
- Finished Goods

Different prefixes are used for item numbers to identify these item types.

The company requires the following system setup:

- Use a unique number series for each item type.
- No. Series must be selectable when creating manual items.
- Implement automatic number assignment.

You need to configure the system.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

- Enable the ability to use default numbers.
- Create a number series.
- Create relationships between the number series.
- Set the default number series on the Inventory Setup page.

Number series configuration

Suggested Answer:

Number series configuration

- Enable the ability to use default numbers.
- Create a number series.
- Create relationships between the number series.
- Set the default number series on the Inventory Setup page.

 **Sridhar.hm** Highly Voted 3 months, 3 weeks ago

Correct Sequence is BACD

upvoted 6 times

 **f5b341e** Most Recent 3 months, 4 weeks ago

the way I understand this, we first create no. series then Scroll down in the No. Series list until you see the ITEM code, there is a checkbox "Default Nos." then you can check the box(enable to use default Nos.) so the first answer should be create No. series, enable default Nos. then create relationships and set the default Nos. on the Inventory Setup page

upvoted 4 times

DRAG DROP

A company uses Business Central and plans to automate its processes by using Power Automate.

The company finance manager wants to restrict access to Power Automate features. Only trained users must be able to create and run instant flows in Business Central.

You need to set up access control for specific users.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- As an administrator, agree to the integration notice on the Privacy Notices Status page on behalf of all users or allow users to decide themselves.
- Validate that authorized users have the Automate Action permission.
- Add the system permission Allow Action Automate (ID 9630) to the assigned permissions sets.
- As an administrator, disagree to the integration notice on the Privacy Notices Status page on behalf of all users.
- Remove the system permission Allow Action Automate (ID 9630) from the assigned permissions sets.

Power Automate integration with Business Central

Suggested Answer:

Power Automate integration with Business Central

- As an administrator, disagree to the integration notice on the Privacy Notices Status page on behalf of all users.
- Add the system permission Allow Action Automate (ID 9630) to the assigned permissions sets.
- Validate that authorized users have the Automate Action permission.

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

-

To display the first question in the case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Background

-

Fabrikam, Inc., is a manufacturer of products for the gift industry. The company plans to implement Business Central as its new enterprise resource planning (ERP) system.

The company sells to two types of customers: wholesale and retail. Retail customers order at special events and online. Wholesale customers send in orders by email.

Current Environment

-

Order processing

-

- The company uses a purchase order (PO) workflow for any PO over \$500.
- The system has been fully configured for sales order prepayments and will check for a prepayment invoice at posting.
- Customers can special order products with a prepayment that is due on receipt.

Invoicing

-

- Wholesale customer payment terms are net 30, with a 2% discount if paid within 10 days.
- Retail customer payment terms are payable on receipt or shipment.

Reporting

-

- The company uses headcount (number of employees) and square footage for statistical accounts.

Integrations

-

The company currently uses Outlook, Excel, Word, and Teams to communicate internally and externally with customers and vendors.

Requirements

-

Order processing

-

- The company must be able to combine multiple purchase receipts into one vendor invoice.
- Posted vendor invoices must be reverted when damages are reported or a product is returned to the vendor.
- Fully invoiced POs must not appear on the PO list page.
- Customer prepayments vary based on customer relationship. Special orders from new customers have a 25% prepayment. Established customers have only a 15% prepayment.
- The company must be able to approve POs by email without opening Business Central.
- Customers often reorder the same items with similar quantities. The system must be configured to ask the user if recurring lines should be added to sales orders.

Invoicing

-

- Customer revenue must be posted to separate general ledger (G/L) accounts based on customer type. The G/L account must have subcategories for wholesale and retail revenue.
- Accounts receivable must be posted to separate G/L accounts based on customer type. The G/L account must have subcategories for wholesale and retail accounts receivable.
- Currently, inventory is sold at a cost based on purchase and sales over a period.

Reporting

-

- Financial reports must include statistical accounts.
- The financial report structure must map to account categories.

Integrations

-

The company requires the following integration capabilities:

- Create sales orders while collaborating with customers by email.
- Edit customer information while messaging the sales team in a group chat.
- Communicate a brochure to all customers at once about a sales campaign.

General ledger posting accounts

The company requires the following G/L posting accounts:

- Retail Receivables = 13100
- Wholesale Receivables = 13200

- Payment Discount = 54800
- Retail Sales = 44100
- Wholesale Sales = 44200
- Sales Prepayments = 22160

Issues

-
- Order entry takes too long for wholesale customers.
- Vendors ship partial orders but send one monthly invoice. The company is unable to associate one invoice with multiple POs in the current environment.
- Inventory reconciliation was difficult in the company's old system because it allowed users to sell more inventory than was physically available.
- Users must log in to the system to provide workflow approvals.

You need to recommend integration solutions to fulfill the company requirements.

Which Microsoft integration aligns with each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

A company uses Dynamics 365 Business Central to manage receivables.

You must import a series of payments from a bank account and automatically match the payments against similar ledger entries already entered in Business Central.

You need to import and apply the payments to the ledger entries that are automatically matched by the system.

Which form should you use?

- A. Payment services
- B. Payment Application Rules
- C. Payment Reconciliation Journal
- D. Payment Registration

Suggested Answer: C

You must regularly reconcile your bank, receivables, and payables accounts by applying payments recorded in the bank to their related open (unpaid) invoices and credit memos or other open entries in Business Central.

You can perform this task on the Payment Reconciliation Journal page, for example, by importing a bank statement file or feed to quickly register the payments.

Payments are applied to open customer or vendor ledger entries based on matches between payment text and entry information.

Note: The Payment Reconciliation Journal page specifies payments, either incoming or outgoing, that have been recorded as transactions on your online bank account or on a payment service and that you can apply to their related open customer, vendor, and bank account ledger entries. The lines in the journal can be filled in by importing a bank statement as a bank feed or file or by manually entering transactions that you make on your payment service.

Box 1: No. Series -

No. Series: For each company that you set up, you need to assign unique identification codes to things such as general ledger accounts, customer and vendor accounts, invoices, and other documents. Numbering is important not only for identification. A well-designed numbering system also makes the company more manageable and easy to analyze, and can reduce the number of errors that occur in data entry.

Box 2: Document Sending Profiles

You can set each customer up with a preferred method of sending sales documents, so that you do not have to select a sending option every time you choose the Post and Send action.

On the Document Sending Profiles page, you set up different sending profiles that you can select from in the Document Sending Profile field on a customer card.

Both answers are wrong!

Both in done in "Sales & Receivalbes Setup

1. Field: Shipment on Invoice

2. Field: Post & Print with Job Queue and Report Output Type (Registers: Background Posting)

upvoted 28 times

🗨️ 👤 **HeidiE** 1 year, 8 months ago

Agree with number 1., not 2.. Under the tab "sending options" on document sending profiles page you have "disk" which states the following "Specify if the document is saved as a PDF file when you choose the Post and Send button.

upvoted 6 times

🗨️ 👤 **SHKhan** Highly Voted 2 years ago

Answer 1 is Sales & receivable Setup and Answer 2 is Document Sending Profiles.

upvoted 13 times

🗨️ 👤 **adriankohws** Most Recent 5 months, 3 weeks ago

It is a norm that always ask question with ambiguous situation, answer of No. Series is not wrong either, just that Sales & Rec is more important.

upvoted 1 times

🗨️ 👤 **Elmar31** 1 year, 3 months ago

Well I beleive it is 4 1

reason:

- Sales & Recievables is needed to do the create a shipment document for every sale.

- document sending allows you to time when to store the documents. Hence my answer is.

1: Sales & Recievables

2: Document sending

You are creating payment terms.

A company processes standard vendor payments on the seventh day of the next month.

You need to set up payment terms for the vendor.

Which date formula should you use?

- A. 37D
- B. 1M+7D
- C. 1M+6D
- D. CM+7D

Suggested Answer: D

la d es correcta
upvoted 1 times

ivanrlg 1 year, 6 months ago

Selected Answer: C

The correct answer is D.

The date formula CM+7D means "the end of the current month plus 7 days." This is the correct formula to use for a company that processes standard vendor payments on the seventh day of the next month.

upvoted 1 times

🗨️ **Djanck** 1 year, 7 months ago

Here is a more detailed analysis on the "Date Formula" values... We can see that '<CM>' means the <end of the current month> for example:

upvoted 1 times

🗨️ **NA1926** 1 year, 7 months ago

Selected Answer: D

correct

upvoted 1 times

🗨️ **Kelvin97** 1 year, 10 months ago

1M+7D is my take

upvoted 1 times

🗨️ **Elmar31** 1 year, 4 months ago

that is only right for invoices posted on the first. 1M+7D could also be seen as 30 Days (1M) + 7 Days. Hence if you use your 1M+7D the invoice will always become billable in 37Days not the 7th next month.

Also if you post any invoice in Feb you will be wrong no matter what

upvoted 1 times

🗨️ **luckyshabir** 2 years, 6 months ago

In my point of view all the options are not correct. The Answer should be D7, as per below explanation from Microsoft

The following example shows how to use a time unit and a number.

Expression Meaning

D10 The next 10th day of a month

upvoted 1 times

🗨️ **SHKhan** 1 year, 11 months ago

D7 would means The next 7th day of a month not of next month and the question is asked to assign 7th day of next month so the right answer would be CM+7D. Therefore correct answer is Option D.

upvoted 1 times

🗨️ **AndriWianto** 2 years, 11 months ago

Selected Answer: D

Current Month + 7 days.

upvoted 2 times

🗨️ **BlaqAkan** 3 years ago

This answer is wrong the correct option is B. here is my prove, a copied text from the docs for your perusal, find below. T for Thanks One love from Nigeria

The following example shows how you can combine these three forms as needed.

Expression Meaning

CM+10D Current month + 10 days

upvoted 2 times

🗨️ **Mohratus** 3 years, 1 month ago

CM + 7D is correct. It calculates the 7th day after the current month (month that it is booked) as the payment date

upvoted 2 times

A company purchases items by using cash. You register a vendor payment when you post a purchase invoice for a cash vendor. You are creating a new cash vendor. No prior vendors have been set up as cash vendors. You need to set up the vendor so that payments post automatically when you post a purchase invoice. Which type of setup should you use?

- A. Payment Method as Cash
- B. Payment Term as COD
- C. Payment Method as Cash with balancing account
- D. Prepayment

Suggested Answer: C

Monetary amounts for local currency must always display three decimal places.

In General Ledger Setup, you need to configure the appropriate setup field with the appropriate value.

What should you do?

- A. Set the value of Amount Decimal Places to 3:3
- B. Set the value of Unit-Amount Decimal Places to 3:3
- C. Set the value of Inv. Rounding Precision to 0.001
- D. Set the value of Unit-Amount Rounding Precision to 0.001
- E. Set the value of Amount Rounding Precision to 0.001

Suggested Answer: A

The two threes in 3:3 mean a minimum of three decimal places and a maximum of 3 decimal places. In other words, it will always display three decimal places.

A is correct

upvoted 1 times

Nereluli 1 year, 6 months ago

Selected Answer: A

la A es correcta

upvoted 1 times

ivanrlg 1 year, 6 months ago

Selected Answer: A

The correct answer is A. The account cannot be used in any posting groups or posting setup.

If the Check G/L Account Usage field is selected in the General Ledger Setup, then the account must not be used in any posting groups or posting setup before it can be deleted. This is to prevent discrepancies in the general ledger.

If the account is used in any posting groups or posting setup, then it will not be possible to delete it. The other options are not requirements for deleting a general ledger account.

The general ledger account for accounts receivable must match the sum of all balances on the customer cards. You need to set up the general ledger account card for accounts receivable to meet this requirement. What should you do?

- A. Configure the account type.
- B. Block the account.
- C. Configure totaling.
- D. Disallow direct posting.

Suggested Answer: D

Community vote distribution

D (100%)

AndriWianto Highly Voted 2 years, 11 months ago

Selected Answer: D

By disabling Direct Posting, you can be sure that the receivable account will only be posted with the Customer Ledger Entries. You can be sure that they will be reconciled.

Totaling is only totaling the GL Account, eg. Total Receivables is the totaling for Receivable - Local and Receivable - Export.

upvoted 6 times

Je_ga Most Recent 8 months, 2 weeks ago

Selected Answer: D

D is the one

upvoted 1 times

ivanrlg 1 year, 6 months ago

Selected Answer: D

D. Disallow direct posting.

Disallowing direct posting to the accounts receivable general ledger account would ensure that all entries to this account come from the customer cards. This would help to maintain the integrity of the accounts receivable balance, as it would always match the sum of the balances on the customer cards.

upvoted 2 times

🗨️ **r44712** 1 year, 9 months ago

The correct answer is:

- * Select Exact Cost Reversing Mandatory
- * Select Return Receipt on Credit Memo
- * Choose 'Yes' for Default Item Quantity

Two of the options for generating the Item Qty. are invalid, as they relate to a Shipping Qty. and not line Quantities.

upvoted 2 times

🗨️ **KateTs** 2 years, 9 months ago

List a default quantity of ONE on the credit memo lines can be only achieved by enabling Default Item quantity that specifies that the Quantity field is set to 1 when you fill in the Item No. field. So, 1,1,1 are correct answers.

upvoted 2 times

🗨️ **daniza87** 3 years ago

It's correct

upvoted 1 times

🗨️ **Gwen74** 3 years, 7 months ago

1. Exact cost reversing
2. Return receipt on Credit Memo
3. Remainder for default quantity to ship (by default, if 10 qty on order, the field Qty to ship will be 10). Blank, means you have to enter the quantity to ship each time before posting

upvoted 2 times

🗨️ **manipa7el** 3 years, 2 months ago

You didn't read the question properly, it says: "List a default quantity OF ONE on the credit memo lines" - this is exactly what happens when you choose 'Yes' for Default Qty. to Ship under Sales & Receivable Setup.

upvoted 5 times

🗨️ **Ashean** 3 years, 8 months ago

1. Exact cost reversing
2. Return Receipt on Credit Memo
3. Choose Remainder for default qty to ship

upvoted 3 times

🗨️ **AndriWianto** 2 years, 11 months ago

No. 3 is incorrect. Your answer is for "default qty. to SHIP".

The question is "the default QTY. of 1".

upvoted 1 times

DRAG DROP -

You are implementing Dynamics 365 Business Central. The accounting manager of the company provides you with the chart of accounts. You need to set up specific posting groups according to the chart of accounts.

Which setup should you use? To answer, drag the appropriate setup to the correct action. Each setup may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

 I agree with Soladejo, line Discount is not available in Purchases & Payables setup

upvoted 2 times

🗨️ 👤 **cetebv** 3 years, 7 months ago

Yes it is. Check the General fast tab, on (option type)field: Discount Posting

upvoted 4 times

🗨️ 👤 **GuriKaur** 3 years, 1 month ago

On purchase & payable page under general tab the first option is discount posting is line /invoice /All or No

upvoted 1 times

🗨️ 👤 **SHKhan** 2 years ago

It is available, you have to select Line discounts value from Discount Posting option field.

upvoted 1 times

🗨️ 👤 **GMK** 3 years, 8 months ago

The given answer is correct

upvoted 4 times

🗨️ 👤 **soladejo** 3 years, 8 months ago

under purchase and payable setup no room for line discount provisioning , i think the right answer should be Cal. invoice Discount

upvoted 1 times

🗨️ 👤 **manipa7el** 3 years, 2 months ago

As per cetebv's comment, Line Discount is definitely an option under Discount Posting. The reason it cannot be Cal. Inv. Discount is because the question says 'the accountant must be able to report discount received on purchased ITEMS. Therefore the configuration needs to be at line level, not invoice level.

upvoted 4 times

🗨️ 👤 **grantswithi** 3 years, 9 months ago

Answer 1 i doubted but think its correct just worded back to front - Discount Posting then line posting

upvoted 1 times

A company is implementing Dynamics 365 Business Central.

The company needs to post monthly general journal batches for purchase expenses incurred throughout the month. The posted entries must have unique, incremental document numbers. The numbers must increment by one and be sequential.

You need to configure the system to meet the requirements.

Which three actions should you perform in sequence? Each correct answer presents part of the solution.

- A. Create a Template Batch with Posting No. Series.
- B. Create the No. Series.
- C. Configure a General Journal with Purchase Reason Code.
- D. Configure a General Journal Template with Purchase Type.
- E. Create a Template Batch with No. Series.

Suggested Answer: *BCE*

Community vote distribution

ABD (83%)

Other

 **Yugene** Highly Voted 3 years, 3 months ago

I think the Answer is B, A, D.

B- Ofcourse, you have to create the number series to be used.

A. Because of the requirement for incremental document number

D. Since this is General Journal which must be used for Purchase expense, the type has to be Purchase.

upvoted 30 times

 **bcws** Highly Voted 3 years, 4 months ago

"The posted entries must have unique incremental document numbers" -- based on this requirement, it should be Posting No. Series. Also, there is no specific requirement that states a Reason Code is required (and putting "Purchase Reason Code" in title case is confusing as well, and it suggests that's a field and there's no such field on the Journal Line, only "Reason Code").

In real life situation, such business requirement would be to set up a Recurring General Journal. Therefore the choices in the answer do not seem to be correct to start with.

upvoted 6 times

 **IJH** Most Recent 1 year, 2 months ago

B, C, E is most likely correct. There is no requirement in the question for the posted No. Series to be different from the No. Series. Thus just creating and selecting the No. Series will suffice to meet the requirement.

upvoted 1 times

 **IJH** 1 year, 2 months ago

I meant B,D,E

upvoted 1 times

 **ivanrlg** 1 year, 6 months ago

Selected Answer: ABD

B. Create the No. Series.

This step involves creating a number series that will be used to generate the unique, incremental document numbers. The number series should be configured to increment by one and be sequential.

A. Create a Template Batch with Posting No. Series.

Once the number series is created, you can create a template batch for the general journal entries. This template batch should be configured with the posting number series created in the previous step.

E. Create a Template Batch with No. Series.

Finally, you should create a template batch with the number series. This will ensure that each posted entry has a unique, incremental document number.

Selected Answer: ABD

Definitely ABD, because E i before posting and here we talking about Posted entries.
upvoted 3 times

🗨️ **AndriWianto** 2 years, 11 months ago

Selected Answer: ABD

1. You must create a no. series.
2. Posting No. Series is used for posted numbering.
3. Type Purchase to set it for Purchase Journal.
upvoted 2 times

🗨️ **damorano** 3 years ago

Answer is :
B. Create the No. Series.
D. Configure a General Journal Template with Purchase Type.
E. Create a Template Batch with No. Series.

No series generates incremental document numbers and super cedes the posting no series in any operation, so leaving the posting no series blank is okay for this request.

There is a type purchase, we do not necessarily need a source code.

And of course we generate a template batch with no series.

<https://docs.microsoft.com/en-us/learn/modules/general-journal-templates-dynamics-365-business-central/1-templates>

upvoted 5 times

🗨️ **SHKhan** 2 years ago

In your explanation B & E are doing the same and if we need a unique numbering after posting then Option A needs to be selected.
upvoted 1 times

🗨️ **daniza87** 3 years ago

I think the key is "sequence". In sequence this is the only possible way

🗨️ 👤 **daniza87** 3 years ago

D is not possible because in "Journal Template" field Type do not exists
upvoted 2 times

🗨️ 👤 **GuriKaur** 3 years, 1 month ago

should be A,B,E C is not compatible with question
upvoted 2 times

🗨️ 👤 **manipa7el** 3 years, 2 months ago

The only answer I don't think is right:

C - I don't see how a Reason Code is relevant here, the purchase of a Reason Code is for audit trails.

I agree that B is correct - you need to setup a No. Series.

If they're saying E is correct then so is A. The only difference I can see is when the document number is generated - under A it's generated when posted, and under E is generated when the information is being populated. With E you can use the 'Re-number Document Numbers' function before posting to make sure you don't get any posting errors because of document number.

D would also work. By changing the Type to Purchase, BC will change the source code from GENJNL to PURCHJNL (this dictates the default layout of the journal). The key difference is you will be working with a Purchase Journal instead of a General Journal.

Thoughts?

upvoted 2 times

🗨️ 👤 **ValeriaM** 3 years, 4 months ago

I think the correct answer is A,B and C. A, because we need the doc No. not to be modified. If we configure the series in Series No. field, the user will be able to modify the No. series before posting.

B, because we need to create the No. series to use it. and C, because although it is not specified that the reason code must be a must, the customer is interested in keeping register of expenses, so I think that may be valid.

DRAG DROP -

An accountant discovers inconsistencies between financial statements and balances in the chart of accounts.

You suspect that the discrepancies might be a result of missing categories and subcategories.

You need to ensure that the financial statements match the chart of accounts.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create subcategories for each category.

Rename the general ledger account to match the category and subcategory in the chart of accounts.

Verify that the financial statements match the chart of accounts.

Add the accounts to the analysis view.

Add the missing categories and subcategories to the general ledger accounts.

Answer Area

Suggested Answer:

Actions

Create subcategories for each category.

Rename the general ledger account to match the category and subcategory in the chart of accounts.

Verify that the financial statements match the chart of accounts.

👤 **bcws** Highly Voted 3 years, 4 months ago

Currency Code should be blank.
upvoted 12 times

🗨️ 👤 **Elmar31** Most Recent 1 year, 4 months ago

I believe it is correct.

USD needs to be selected. Reason here is that a blank will do more than just using LCY.

Bank accounts work differently depending on whether a currency code is specified:

If the currency code is blank

All transactions in the bank account are in the local currency (LCY) for the current company. If a transaction is made to the account in another currency, the amounts are posted to the account in LCY based on the relevant currency exchange rate. Any checks issued from this account must be issued in LCY. If the bank account is used in a journal, the journal line will automatically inherit the blank currency code.

Currency code is specified

All transactions made to and checks issued from this account must be in the same currency as specified on the account.

Hence if you ONLY want USD to be used on the account you need to select USD not <blank>

Source:

<https://learn.microsoft.com/en-us/dynamics365/business-central/bank-how-setup-bank-accounts>

upvoted 3 times

🗨️ 👤 **Lejrus** 1 year, 6 months ago

Confusing about the currency here based on a poor description.

Here is what we know:

The local currency code (LCY) for the company is set to US dollars (\$)

⇒ Use US dollars.

"US Dollars" is used in both sentences, meaning we can leave it blank. However, if it said "Use USD" we would be in a tricky situation since the LCY is set to US Dollars and we would probably have to select USD for the currency code. (I'm refering to the LCY Code in the General Ledger Setup).

In theory, this means that you could use the currency "paper" by leaving the currency code blank IF the LCY Code is "paper" in the general ledger setup.

In some of these questions you really have to study the text.

upvoted 1 times

🗨️ 👤 **SHKhan** 2 years ago

if a currency code is described as LCY in general Ledger setup example as USD and Symbol as \$ then at time of creating bank account you will not find that currency in Currency code list this means you can leave it Blank. So the correct answer would be BLANK in my opinion.

upvoted 2 times

🗨️ 👤 **Charisty** 2 years, 2 months ago

US dollar is local currency then It should be blank.

upvoted 5 times

🗨️ 👤 **KMnb** 2 years, 7 months ago

I think this question is a littel bit tricky...! In my exam last week the same question was raised. I thin "USD" as the currency code is correct because the question has \$ as LCY mentioned and not "USD". Therefore you have to set the currency code in the bank account to "USD". If the currency code in the LCY would be "USD" then it would be "blank" in the bank account.

upvoted 1 times

🗨️ 👤 **hp98482** 2 years, 7 months ago

Thanks for the information.

upvoted 1 times

🗨️ 👤 **Kindo** 1 year, 11 months ago

But if you do so, the account will be recognized as a "foreign currency" bank account. Then you should also enter USD on the "Currency" Table and enter a fixed exchange rate of 1 between LCY (\$) and USD in Exchange rates. This setup would be wrong. In such a case it should be better to leave "Blank" on the new bank account and go to the General Ledger Setup and there change \$ to USD in the field "LCY Code". What is more interesting the field "LCY Code" on the setup does not have lookup to Currency Table, so theoretically you can leave there \$ as the LCY code.

upvoted 2 times

🗨️ 👤 **HardikBariya** 2 years, 7 months ago

Currency for bank should be blank.

Selected Answer: E

This creates an error, purchase price do not create an error if its missing.
upvoted 1 times

ivanrlg 1 year, 6 months ago

Selected Answer: D

The correct answer is D. Purchase Prices.

The Purchase Prices option on the vendor card is used to define the agreed-upon prices and discounts for items that are purchased from the vendor. If the Purchase Prices option is not populated, the system will not be able to verify that purchase invoices use the agreed-upon prices and discounts. This will cause a validation error when creating a purchase order for the vendor
upvoted 1 times

elviriveros 1 year, 1 month ago

This is false. If the purchase prices do not have the supplier information in the purchase order, it does not cause any validation errors, so simple that the purchase price can be entered manually. The only thing that causes a validation error is the provider registration group.
upvoted 1 times

Lejrus 1 year, 6 months ago

Selected Answer: E

Vendor posting group is the only thing that could cause a validation error out of these options. The purchase price is just there to confuse you.

🗨️ 👤 **Grade92** 2 years, 5 months ago

It's correct, be careful of answering "Location Code"; it would be correct because it would come out as a validation error as well, but it's not related with the vendor card, as it is in the question.

upvoted 2 times

🗨️ 👤 **ValeriaM** 3 years, 4 months ago

Shouldn't it be Purchase Prices?

upvoted 4 times

🗨️ 👤 **manipa7el** 3 years, 2 months ago

Please disregard my earlier comment as I misread the question and details.

upvoted 1 times

🗨️ 👤 **manipa7el** 3 years, 2 months ago

I also thought this. I wonder if they're saying Purchase Price isn't going to create a validation error? The purchase price will either get picked up (if there is a valid one) but if there is no purchase price, then you need to add it in manually? Does BC normally perform its validation check when you attempt to post something to a ledger? Say you set up a purchase price, but you've forgotten to add a GL account under purchase account in the General Posting Setup - BC will still pick up the price and even let you receive the inventory, but it will throw an error if you try to invoice because you haven't said where the purchase needs to be posted.

upvoted 1 times

🗨️ 👤 **GuriKaur** 3 years, 1 month ago

They are basically check the discount on invoice whatever they had setup

upvoted 1 times

🗨️ 👤 **GuriKaur** 3 years, 1 month ago

But they are facing error at the time of PO and if there is purchase price already mention on vendor card then it will only give error for posting group this is what i experienced

DRAG DROP -

You are setting up the general journals and batches for an accounting department.

The accounting department has multiple users who will work simultaneously within different general journals.

You need to set up the different journal templates and batches for each user according to the company's requirements.

Which options should you use? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Options

- Force Doc. Balance
- No. Series
- Posting No. Series
- Standard Journal Code
- Suggest Balancing Amount

Answer Area

Requirement	Option
Prefill the amount on journal lines based on the document number.	<input type="text" value="Option"/>
Assign document numbers to ledger entries, independently from the user's journal batch.	<input type="text" value="Option"/>
Balance the journal lines by document type.	<input type="text" value="Option"/>

Suggested Answer:

Options

-
- No. Series
-
- Standard Journal Code
-

Answer Area

Requirement	Option
Prefill the amount on journal lines based on the document number.	<input type="text" value="Suggest Balancing Amount"/>
Assign document numbers to ledger entries, independently from the user's journal batch.	<input type="text" value="Posting No. Series"/>
Balance the journal lines by document type.	<input type="text" value="Force Doc. Balance"/>

DRAG DROP -

A company uses Dynamics 365 Business Central.

You need to configure payment terms with the correct due date calculation formula.

What should you do? To answer, drag the appropriate values to the correct requirements. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Values	Due Date Calculation	Value
D10	10 days from today	
10D	The next 10 th day of the next month	
1M + 10D	One month + 10 days	

Answer Area

Values	Due Date Calculation	Value
D10	10 days from today	10D
10D	The next 10 th day of the next month	D10
1M + 10D	One month + 10 days	1M + 10D

Reference:

<https://docs.microsoft.com/en-us/dynamics365/business-central/ui-enter-date-ranges>

 **eluchev** Highly Voted 2 years, 2 months ago

Tests from business central using D10.

If Document Date = 5th Sep => Due Date = 10th Sep;

If Document Date = 15th Sep => Due Date = 10th Oct

So technically D10 is the next 10th of the month and not the 10th of the next month

upvoted 6 times

 **Lavoisier** 1 year, 9 months ago

Eluchev, you are right, so the answer is :

10D

1M+10D

1M+10D

I agree that D10 means "The next 10th day of a month". (Diffrent to "The next 10th day of the next month")

upvoted 3 times

 **Elmar31** 1 year, 5 months ago

I have to disagree

the correct answer would be

10D (no one questions this)

CM + 10D (this will make sure that it is on the 10th of the next month !) this leads to a 40 to 10 day timeframe till due date, depending on when this is posted in the month

1M+10D this will lead to a 40 day time till due date

upvoted 2 times

🗨️ **Elmar31** 1 year, 5 months ago

sorry adjustment the answer for 2 is right. We need to set it to D10. As the question asks us to set it that it will be due on the NEXT 10th of the month. This includes the running month. Not sure if there is a usecase in the "wild" out there but the questions answer is right as provided

10D

D10

1M+10D

upvoted 2 times

🗨️ **SHKhan** 1 year, 11 months ago

D10 means 10th day of the month. If the document date is less than 10th of the month then Due date would 10th Day of the same month and if the document date is greater than 10th then it would 10th day of the next month.

upvoted 2 times

correct

upvoted 3 times

🗨️ **Lorot** 2 years, 2 months ago

I think the second answer is wrong. Should be 1M+10D (like the last one).

Why:

D10 is the next 10th day of a month and this can be the actual month, if today the day is smaller than the 10th. But it is asked for the 10th of the next(!) month. -

A little bit tricky! ;-)

upvoted 1 times

🗨️ **Lorot** 2 years, 2 months ago

Sorry, I am wrong! D10 is right, I think.

upvoted 1 times

🗨️ **jakexmueller** 2 years, 2 months ago

D10 is technically the next 10th day of A month, and this questions specifies the NEXT month. CM + 10D would be a more logical answer to me, but D10 seems to be the closest to correct out of the options.

upvoted 2 times

A company uses Dynamics 365 Business Central for their receivables.

The company wants to mark any automatically matched payments to open invoices as not requiring a review if they match the highest degree of confidence that the two transactions are a match.

You need to configure payment matching rules.

Which three criteria should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Statement amount
- B. Account number
- C. Related-party fields
- D. Transaction date
- E. Transaction text

Suggested Answer: ACE

Reference:

<https://docs.microsoft.com/en-us/dynamics365/business-central/receivables-how-set-up-payment-application-rules>

B. Specifies if amounts are rounded for sales invoices. Rounding is applied as specified in the Inv. Rounding Precision (LCY) field in the General Ledger Setup window.

upvoted 2 times

Ozzer 2 years ago

Selected Answer: C

Incorrect.

upvoted 4 times

  **zubokv** 1 year, 7 months ago

I agree with Ozzer. You can specify the Inv. Rounding Precision (LCY) on General Ledger Setup, but it will not have an effect until you enable Invoice Rounding on Sales & Receivables setup.

Since you cannot choose both answers, C is more essential for the requirement.

upvoted 1 times

  **Djanck** 1 year, 7 months ago

I agree with Ozzer for one reason... In the question it states:

"You need to complete the configuration."

The word 'complete' means to *finish*. And to finish configuring sales invoice rounding there is an "Invoice Rounding" activation checkmark field in the "Sales & Receivables Setup" page.

A horrible question for a non-native English speaker.

upvoted 2 times

  **Djanck** 1 year, 6 months ago

Here is exactly why I think it is 'C':

<https://learn.microsoft.com/en-us/dynamics365/business-central/finance-set-up-invoice-rounding#activate-the-invoice-rounding-function>

upvoted 1 times

A company has been using Dynamics 365 Business Central for many years. A new accounting manager for the company reviews the chart of accounts. The manager wants to remove some general ledger accounts. The Check G/L Account Usage field is selected in the General Ledger Setup. You need to assist with the account deletions. What is one requirement that enables deletion of a general ledger account?

- A. The account cannot have a balance amount.
- B. The account cannot be used in any account schedule.
- C. The general ledger account is configured to allow for deletion
- D. The account must have ledger entries.

Suggested Answer: A

A company uses Dynamics 365 Business Central.

You must create a general ledger account and define the general ledger account as a purchase account for general journal transactions. You need to configure the system.

- A. Select Purchase as the value for the Gen. Posting Type field.
- B. Assign a general product posting group that is linked to a purchase account.
- C. Link combination of the general business posting group and general product posting group to a purchase account.
- D. Assign a general business posting group that is linked to a purchase account.

Suggested Answer: C

Reference:

<https://docs.microsoft.com/en-gb/dynamics365/business-central/finance-posting-groups>

Community vote distribution

ivanrlg Highly Voted 1 year, 6 months ago

Selected Answer: A

The correct answer is A.

To configure a general ledger account as a purchase account for general journal transactions, you must select Purchase as the value for the Gen. Posting Type field. This will ensure that the account is used to record purchases made by the company.

The other options are not correct. Assigning a general product posting group or a general business posting group will not affect the way that the account is used for general journal transactions. Linking a combination of the general business posting group and general product posting group is also not necessary.

A company implements Dynamics 365 Business Central.

You need to create a new payment terms record to meet the following requirements:

- ⇒ Ensure that the due date for all vendor invoices is 30 days.
- ⇒ Grant vendors a two percent discount if an invoice is paid within 10 days.

Which three actions should you perform? Each correct answer presents a part of the solution

NOTE: Each correct selection is worth one point.

- A. Set the value of the Discount Date Calculation field to 2D.
- B. Set the value of the Discount Date Calculation field to 10D.
- C. Set the value of the Discount % field to 2.
- D. Set the value of the Due Date Calculation field to 30D.
- E. Set the value of the Discount % field to 10.

Suggested Answer: BCD

B: Discount Date Calculation Specify the formula that is used to calculate the date that a payment must be made in order to obtain a discount.

10 days - 10D.

C: Discount % - Specify the discount percentage that is applied for early payment of an invoice amount.

D: Due Date Calculation - Specify the formula that is used to calculate the date that a payment must be made.

For example, if the payment must be made in one installment after two weeks, enter 14D.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/business-central/localfunctionality/italy/how-to-set-up-payment-terms>

Community vote distribution

BCD (100%)

ivanrlg 1 year, 6 months ago

Selected Answer: BCD

The correct actions to perform are:

- B. Set the value of the Discount Date Calculation field to 10D.
- C. Set the value of the Discount % field to 2.
- D. Set the value of the Due Date Calculation field to 30D.

These settings will ensure that the due date for all vendor invoices is 30 days from the invoice date (Due Date Calculation = 30D), and that vendors are granted a 2% discount if an invoice is paid within 10 days of the invoice date (Discount Date Calculation = 10D and Discount % = 2).

correct

upvoted 3 times

A company is implementing Dynamics 365 Business Central.

Vendor open balances need to be posted to the general ledger (G/L) account directly by using the general journal.

You need to configure the G/L account to allow users to post vendor open balances to payables accounts.

Which setting should you use?

- A. Account Category
- B. Income/Balance
- C. Default Deferral template
- D. Direct Posting

Suggested Answer: D

Direct posting is a very important field. It is used to enable or disable posting directly to the account. How? So, there are G/L accounts that you assign to posting groups like the receivables account, the payables account, and so on, and you would clear the field. In short, direct posting is not allowed there because of the choice you made. You can only post through a posting group.

A company uses Dynamics 365 Business Central.

A user posts a Sales Invoice document that has an incorrect dimension value.

You need to update general ledger entries with the correct dimension value without inserting new ledger entries.

Which option should you use?

- A. Correct Dimensions
- B. Edit List
- C. Edit In Excel
- D. Reverse Transaction

Suggested Answer: A

On the General Ledger Entries page, the Correct Dimensions action lets you correct dimensions on posted entries by editing the dimension value, adding new dimensions, or removing them. Administrators can also lock dimensions for corrections, specify that corrections must respect closed accounting periods, and view a change log for a given G/L entry in order to revert the entry to its original value.

DRAG DROP -

A company uses Dynamics 365 Business Central.

You need to configure the system to meet the following requirements for a purchasing agent:

- ⇒ Create and post purchase documents including purchase receipt lines.
- ⇒ Do not allow agents to read general ledger (G/L) or bank balances.
- ⇒ Restrict access to view G/L amounts.
- ⇒ Ensure that purchasing agents can select G/L codes on purchase documents.

You need to restrict access to view G/L amounts.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer area
Select the permissions sets that you want to modify.	
Remove page permissions for the G/L account list page.	
Remove page permissions for chart of accounts, G/L entries and G/L account card.	
In the Field Filter column, set the value to 1500 .	
Assign a permission set to a user.	
In the row for the G/L account table, select the Security Filter column.	

Suggested Answer:

Actions	Answer area
	Select the permissions sets that you want to modify.
Remove page permissions for the G/L account list page.	Remove page permissions for chart of accounts, G/L entries and G/L account card.
	Assign a permission set to a user.
In the Field Filter column, set the value to 1500 .	
In the row for the G/L account table, select the Security Filter column.	

Box 1: Select the permission sets you want to modify.

Update the user permission sets in Dynamics 365 Business Central, removing the current permission set and adding the new permission set.

Box 2: Remove page permissions for chart of accounts, G/L entries, and G/L account card.

Box 3: Assign a permission set to a user.

HOTSPOT -

A company uses Dynamics 365 Business Central. You are recording incoming payments from customers.

You must record a payment of \$500 for customer 2030 with a posting date of November 16, 2022. The payment must be recorded against bank account No. 1010 with general ledger (G/L) account No. 10100.

You need to populate the cash receipt journal batch in Business Central to properly record the incoming payment to a bank account.

Which value should you use? To answer, select the appropriate options in the answer area,

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Cash receipt journal field	Value
Account Type	<input type="checkbox"/> Customer <input type="checkbox"/> G/L account <input type="checkbox"/> Bank account
Account No.	<input type="checkbox"/> 2030 <input type="checkbox"/> 1010
Amount	<input type="checkbox"/> \$500 <input type="checkbox"/> -\$500
Bal. Account Type	<input type="checkbox"/> Customer <input type="checkbox"/> G/L account <input type="checkbox"/> Bank account
Bal. Account No.	<input type="checkbox"/> 2030 <input type="checkbox"/> 1010 <input type="checkbox"/> 10100

upvoted 1 times

🗨️ **LRL** 1 year, 6 months ago

As per clarification provided by Ivanrlg: No. Series field in General Journal Templates
Posting No. Series field in General Journal Batches, the correct answer is C&D
upvoted 3 times

🗨️ **ivanrlg** 1 year, 6 months ago

Selected Answer: AB

The correct answers are:

No. Series field in General Journal Templates
Posting No. Series field in General Journal Batches
Explanation:

To configure invoice numbers for the journal, you must populate the No. Series field in General Journal Templates and the Posting No. Series field in General Journal Batches. The No. Series field in General Journal Templates specifies the number series that will be used for the journal header, while the Posting No. Series field in General Journal Batches specifies the number series that will be used for the journal lines.

HOTSPOT

A company uses Dynamics 365 Business Central. You are creating a general ledger (G/L) for a checking account in the chart of accounts.

You need to populate the fields on the G/L account card.

Which value should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Field	Value
Income/Balance	<input type="text"/> <ul style="list-style-type: none"> Income statement Balance sheet
Account Category	<input type="text"/> <ul style="list-style-type: none"> Assets Liabilities Equity Income Expense
Account Type	<input type="text"/> <ul style="list-style-type: none"> Code Mandatory Same Code No Code
Direct Posting	<input type="text"/> <ul style="list-style-type: none"> Enabled Disabled

Answer Area

Suggested Answer:

Field	Value
Income/Balance	<input type="text"/> <ul style="list-style-type: none"> Income statement Balance sheet
Account Category	<input type="text"/> <ul style="list-style-type: none"> Assets Liabilities Equity Income Expense
Account Type	<input type="text"/> <ul style="list-style-type: none"> Code Mandatory Same Code No Code
Direct Posting	<input type="text"/> <ul style="list-style-type: none"> Enabled Disabled

I would think the answer is:

- 1) Balance sheet.
- 2) Assets.
- 3) No Code.
- 4) Enable.

A checking account is typically considered an asset in accounting. This is because it represents money that the company has and can use to pay expenses or invest in its operations.

Asset and liability accounts appear on the balance sheet, while income and expense accounts appear on the income statement.

upvoted 8 times

  **IJH** Highly Voted 1 year, 2 months ago

1. Balance Sheet
2. Assets
3. Account Type should be "Posting" all the options are wrong in the question, those refer to dimensions
4. Enabled

upvoted 5 times

  **RonKetter** Most Recent 1 year, 3 months ago

Enabling Direct Posting will not provide the ability to tie the Account balance to only Cash entries such as receipts and payments as a user can enter values that are not supported by subledgers.

upvoted 2 times

 **alsa23** 1 year, 6 months ago

In this case, you should:

B. Configure the currency MXN, then set up the Currency Exchange Rate Service to upload currency rates automatically.

This option allows you to add the MXN (Mexican Peso) currency to Dynamics 365 Business Central and configure it for use in transactions. Setting up the Currency Exchange Rate Service to upload currency rates automatically will ensure that you have accurate and up-to-date exchange rates for converting between the local currency (USD) and the foreign currency (MXN).

A company uses Dynamics 365 Business Central.

A finance manager needs to import a bank statement CSV file into Dynamics 365 Business Central.

You need to configure the system for the file import.

Which three pages should you use to complete the configuration? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Payment Reconciliation Journal
- B. Bank Account Card
- C. Bank Export/Import Setup
- D. Data Exchange Definition
- E. Report Selection - Bank Account

Suggested Answer: ACD

Community vote distribution

BCD (100%)

 **ivanrlg** Highly Voted 1 year, 6 months ago

Selected Answer: BCD

The correct answers are B, C, and D.

To configure the system for the file import, you will need to use the following pages:

Bank Account Card: This is where you will specify the bank account that the file will be imported into.

Bank Export/Import Setup: This is where you will specify the file format and the import settings.

Data Exchange Definition: This is where you will specify the mapping between the fields in the file and the fields in Dynamics 365 Business Central.

Case study -

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study -

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background -

Northwind Traders is an independent, family-owned business. The company distributes natural pet products in the Northwest region of the country/region. Products are purchased directly from manufacturers and distributed by using its own fleet of trucks.

When the company started, deliveries were within a three-hour radius of the warehouse. Due to regional growth, current deliveries require drivers to stay overnight on some routes. The company plans to open a second warehouse to expand the region and eliminate overnights for route drivers. The company also plans to hire a second group of employees to run operations in this new location. The finance and accounting teams will remain in the original location.

The company uses a third-party system for financials and order management. The finance department stated that the company's fiscal year begins on July 1 and ends on June 30. The mm/dd/yyyy date format is used.

As part of the expansion, the owner plans to upgrade to an ERP system and use Business Central to fulfill the company requirements and manage growth.

Current environment -

Orders -

- Orders are emailed to customer service and manually keyed into the inventory system.

Pricing and discounts -

- Customer pricing is determined by the customer market type. Customer market types are Retail, Veterinarian, and Breeder. Each customer is associated with only one market type.
- Vendors offer monthly promotions to customers by item, brand, or item category.
- Invoices should show each customer's base price, the discount amount, and the net price.

Accounts payable -

- The company wants to expand vendor payment options in the new system.

Requirement -

Customers -

- The sales team must be able to do the following:
 - o Quickly set up new customers with the proper settings based on customer type.
 - o Identify customers by market type. Customer posting groups will be used to identify which market the customer belongs to.
- Base price is determined by the customer market type.
- The sales department should receive a warning when entering the order if a customer is over their credit limit.

Sales -

- Customer discounts are offered for specific time frames by item, brand, or product category. Discounts should be added to sales lines automatically.
- Discounts must post to a unique general ledger (G/L) account.
- The business needs to be able to track revenue by location, market, and product category dimensions. Locations 100 and 200 will be set as default dimensions on the two warehouse locations. Food, treats, toys, and supplies are the required product categories, which will be set as default dimensions on the item cards. Each customer card will have a default market dimension.
- The sales manager wants to delete canceled orders and automatically archive them.

Warehouse -

- Orders will be fulfilled from two possible warehouse locations.
- Product will be transferred between locations by using transfer orders.

Sales invoices -

- Invoices will be posted after delivery.
- Invoices will be emailed to the customer.
- The sales department must be able to quickly correct posted invoices for the following scenarios:
 - o Posted invoices that have not been paid.
 - o Posted invoices that have been paid.
 - o Posted invoices created from sales orders.
 - o Posted invoices not created from sales orders.

Accounting -

- The finance department requires that the company has 12 monthly accounting periods per fiscal year.
- Finance department users must be able to reconcile the accounts receivable (AR) subledger to the G/L account at month end.
- AR department users need the ability to settle and close invoices when customers take payment discounts after the payment discount date has passed. AR users should be allowed to accept or reject the payment tolerance.
- Accounts payable (AP) department users must be able to pay vendors by electronic funds transfer (EFT) and use a payment journal batch named EFT to process payments.
- When viewing G/L entries, the finance and accounting teams must be able to see debits and credits instead of a positive or negative amount.
- The company needs to be able to track expenses by department and location. The departments are sales, operations, and administration.
- AR must be able to correct cash application entries.

Issues -

Payment application -

- Customers may have several stores that are responsible for their own orders and payments.
- Occasionally, AR clerks mistakenly apply payments to the incorrect customer invoice.

Invoicing -

- When items are delivered, customers refuse the items for reasons such as damaged or wrong item.
- After the invoices are posted, they must be corrected, which is time-consuming.

Warehouse -

- The sales department and warehouse managers must have visibility into products that are in the process of being transferred between locations.

Accounts -

- Customer accounts are difficult to view by market type.
- The finance team does not have the ability to report revenue by customer type.

Accounting -

- AR users often find variances between the AR subledger and G/L account.
- Customers often take the payment discount after the payment discount date has passed, leaving open invoices for small amounts.
- The AP department is unable to pay vendors by EFT in the current system.
- Finance and accounting team members have trouble validating postings when they use only the amounts field on G/L entries.
- The finance department is unable to run financial reports by market. All revenue postings must reference a market.

You need to resolve the issue reported by the AR users from the finance department.

What should you do?

- A. Switch Blocked on the Customer Card to Yes.
- B. Switch Direct Posting on the G/L Account Card to No.
- C. Switch Blocked on the G/L Account Card to Yes.
- D. Switch Direct Posting on the G/L Account Card to Yes.

Suggested Answer: B

Community vote distribution

B (100%)

🗨️ **ivanrlg** 9 months, 2 weeks ago

Option D (Switch Direct Posting on the G/L Account Card to Yes) allows for postings to be made directly to the G/L account, which is essential for correcting discrepancies between the AR subledger and the G/L account. This option facilitates the adjustments and corrections necessary to reconcile the accounts accurately. It does not directly address the issue of payment discounts after their due date but enables more flexible handling of financial entries, which could indirectly assist in managing those scenarios more effectively.

Case study -

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study -

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background -

Northwind Traders is an independent, family-owned business. The company distributes natural pet products in the Northwest region of the country/region. Products are purchased directly from manufacturers and distributed by using its own fleet of trucks.

When the company started, deliveries were within a three-hour radius of the warehouse. Due to regional growth, current deliveries require drivers to stay overnight on some routes. The company plans to open a second warehouse to expand the region and eliminate overnights for route drivers. The company also plans to hire a second group of employees to run operations in this new location. The finance and accounting teams will remain in the original location.

The company uses a third-party system for financials and order management. The finance department stated that the company's fiscal year begins on July 1 and ends on June 30. The mm/dd/yyyy date format is used.

As part of the expansion, the owner plans to upgrade to an ERP system and use Business Central to fulfill the company requirements and manage growth.

Current environment -

Orders -

- Orders are emailed to customer service and manually keyed into the inventory system.

Pricing and discounts -

- Customer pricing is determined by the customer market type. Customer market types are Retail, Veterinarian, and Breeder. Each customer is associated with only one market type.
- Vendors offer monthly promotions to customers by item, brand, or item category.
- Invoices should show each customer's base price, the discount amount, and the net price.

Accounts payable -

- The company wants to expand vendor payment options in the new system.

Requirement -

Customers -

- The sales team must be able to do the following:
 - o Quickly set up new customers with the proper settings based on customer type.
 - o Identify customers by market type. Customer posting groups will be used to identify which market the customer belongs to.
- Base price is determined by the customer market type.
- The sales department should receive a warning when entering the order if a customer is over their credit limit.

Sales -

- Customer discounts are offered for specific time frames by item, brand, or product category. Discounts should be added to sales lines automatically.
- Discounts must post to a unique general ledger (G/L) account.
- The business needs to be able to track revenue by location, market, and product category dimensions. Locations 100 and 200 will be set as default dimensions on the two warehouse locations. Food, treats, toys, and supplies are the required product categories, which will be set as default dimensions on the item cards. Each customer card will have a default market dimension.
- The sales manager wants to delete canceled orders and automatically archive them.

Warehouse -

- Orders will be fulfilled from two possible warehouse locations.
- Product will be transferred between locations by using transfer orders.

Sales invoices -

- Invoices will be posted after delivery.
- Invoices will be emailed to the customer.
- The sales department must be able to quickly correct posted invoices for the following scenarios:
 - o Posted invoices that have not been paid.
 - o Posted invoices that have been paid.
 - o Posted invoices created from sales orders.
 - o Posted invoices not created from sales orders.

Accounting -

- The finance department requires that the company has 12 monthly accounting periods per fiscal year.
- Finance department users must be able to reconcile the accounts receivable (AR) subledger to the G/L account at month end.
- AR department users need the ability to settle and close invoices when customers take payment discounts after the payment discount date has passed. AR users should be allowed to accept or reject the payment tolerance.
- Accounts payable (AP) department users must be able to pay vendors by electronic funds transfer (EFT) and use a payment journal batch named EFT to process payments.
- When viewing G/L entries, the finance and accounting teams must be able to see debits and credits instead of a positive or negative amount.
- The company needs to be able to track expenses by department and location. The departments are sales, operations, and administration.
- AR must be able to correct cash application entries.

Issues -

Payment application -

- Customers may have several stores that are responsible for their own orders and payments.
- Occasionally, AR clerks mistakenly apply payments to the incorrect customer invoice.

Invoicing -

- When items are delivered, customers refuse the items for reasons such as damaged or wrong item.
- After the invoices are posted, they must be corrected, which is time-consuming.

Warehouse -

- The sales department and warehouse managers must have visibility into products that are in the process of being transferred between locations.

Accounts -

- Customer accounts are difficult to view by market type.
- The finance team does not have the ability to report revenue by customer type.

Accounting -

- AR users often find variances between the AR subledger and G/L account.
- Customers often take the payment discount after the payment discount date has passed, leaving open invoices for small amounts.
- The AP department is unable to pay vendors by EFT in the current system.
- Finance and accounting team members have trouble validating postings when they use only the amounts field on G/L entries.
- The finance department is unable to run financial reports by market. All revenue postings must reference a market.

You need to train the Accounts Receivable (AR) department how to correct customer payment application issues.

What are two possible ways to achieve this? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Unapply entries from the customer ledger entries.
- B. Unapply entries from the detailed customer ledger entries.
- C. Unapply entries from the customer card.
- D. Apply entries from the Detailed Customer Ledger Entries page.

You need to configure Business Central to display G/L entries as required by the accounting team.

Which configuration should you use?

- A. Show Amounts
- B. Check G/L Account Usage
- C. G/L Account Card
- D. Debit/Credit

Suggested Answer: A

Community vote distribution

D (100%)

 **e96422e** 6 months, 1 week ago

Debit/credit

upvoted 1 times

 **ivanrlg** 9 months, 2 weeks ago

Selected Answer: D

D. Debit/Credit

This option aligns with the request to display entries in a traditional accounting format, where transactions are shown as either debits or credits in separate columns. This setup helps in making the accounting records clearer and more understandable for users accustomed to this traditional format, facilitating easier analysis and reconciliation.

débito y crédito mostrarían los movimientos de las cuentas

upvoted 1 times

 **Hugh91** 10 months, 2 weeks ago

Accounting requirement : "When viewing G/L entries, the finance and accounting teams must be able to see debits and credits instead of a positive or negative amount."

In general ledger setup : 'Show Amount' has 3 options :

- Amount only
- Debit/credit only
- All Amounts

the correct answer could be 'debit/credit only'.

upvoted 3 times

  **9ec28cb** 2 weeks ago

I agree, and I think correct answer should be "A. Show amounts", because this is the name of the field in which I can choose option "debit/credit only"

upvoted 1 times

A company has been using Dynamics 365 Business Central for many years.

A new accounting manager for the company reviews the chart of accounts. The manager wants to remove some general ledger accounts.

The Check G/L Account Usage field is selected in the General Ledger Setup.

You need to assist with the account deletions.

What is one requirement that enables deletion of a general ledger account?

- A. The account cannot be used in any posting groups or posting setup.
- B. The general ledger account is configured to allow for deletion.
- C. The general ledger account cannot allow for direct posting.
- D. The general ledger account must be of the type Balance Sheet.

A manufacturer is implementing Dynamics 365 Business Central as a new financial system.

The manufacturer requires financial reports to match reports produced by the current financial system.

You need to create account categories and subcategories to align with historical financial reports.

What are two possible ways to achieve this goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Rename top-level account categories.
- B. Create or delete account subcategories.
- C. Create top-level account categories.
- D. Add a subcategory to the general ledger account and update the equivalent account schedule.

answer is C

upvoted 1 times

🗨️ **ivanrlg** 9 months, 2 weeks ago

Selected Answer: C

C. The account cannot have a balance amount.

This requirement is critical because a G/L account with a balance indicates that there are still financial transactions associated with the account, which could affect the accuracy of financial reports and the overall financial standing of the company if deleted. Before a G/L account can be safely removed, it must be ensured that the account's balance is zero, indicating no outstanding transactions are associated with it.

DRAG DROP

-

You are implementing Business Central for a company.

The company requires set up of the following postings:

- Automatic posting invoice rounding accounts for acquisition external parties
- Automatic posting entries linked to activities with financial institutions
- Automatic posting discounts granted to entities purchasing goods or services

The accounting manager provides you with the chart of accounts.

Which posting group should you use for each requirement? To answer, move the appropriate posting groups to the correct requirements. You may use each posting group once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Posting groups	Posting groups	Posting group
Vendor posting groups	Requirement	
General posting groups	Automatic posting invoice rounding accounts for acquisition external parties	
Customer posting groups	Automatic posting entries linked to transactional activities with financial institutions	
Bank account posting groups	Automatic posting discounts granted to entities purchasing goods or services	

Suggested Answer:

Posting groups	Requirement	Posting group
	Automatic posting invoice rounding accounts for acquisition external parties	Customer posting groups
	Automatic posting entries linked to transactional activities with financial institutions	Bank account posting groups
	Automatic posting discounts granted to entities purchasing goods or services	Vendor posting groups

 **python123** 1 month, 3 weeks ago

1. Automatic posting invoice rounding accounts for acquisition external parties:

Vendor Posting Groups: Since this is related to acquisition (purchases from external parties), you would use the vendor posting groups to set up the rounding accounts for invoices.

2. Automatic posting entries linked to activities with financial institutions:

Bank Account Posting Groups: This type of transaction would involve financial institutions, so the correct posting group would be bank account posting groups for the automatic entries.

3. Automatic posting discounts granted to entities purchasing goods or services:

Customer Posting Groups: This refers to discounts granted to customers or entities purchasing goods or services, so the correct posting group would be customer posting groups.
