Which two tools can be used to configure Cloud NGFWs for AWS? (Choose two.)

- A. Prisma Cloud management console
- B. Cortex XSIAM
- C. Cloud service provider (CSP) management console
- D. Panorama

Suggested Answer: *CD*

In which two applications can Prisma Access threat logs for mobile user traffic be reviewed? (Choose two.)

- A. Prisma Cloud dashboard
- B. Strata Cloud Manager (SCM)
- C. Strata Logging Service
- D. Service connection firewall

Suggested Answer: *BC*

A network security engineer needs to implement segmentation but is under strict compliance requirements to place security enforcement as close as possible to the private applications hosted in Azure.

Which deployment style is valid and meets the requirements in this scenario?

- A. On a PA-Series NGFW, configure several Layer 3 zones with Layer 3 interfaces assigned to logically segment the network.
- B. On a VM-Series NGFW, configure several Layer 3 zones with Layer 3 interfaces assigned to logically segment the network.
- C. On a VM-Series NGFW, configure several Layer 2 zones with Layer 2 interfaces assigned to logically segment the network.
- D. On a PA-Series NGFW, configure several Layer 2 zones with Layer 2 interfaces assigned to logically segment the network.

Suggested Answer: *B*

When adding a Zero Touch Provisioning (ZTP) firewall to Panorama, when can the firewall be powered on?

- A. During license activation
- B. After activating registration and completing license deployment profile
- C. After all required installation and setup procedures are completed
- D. During installation

Suggested Answer: *B*

Which profile can help prevent the transmission of sensitive information to internet applications?

- A. Antivirus
- B. Data Filtering
- C. Anti-spyware
- D. URL Filtering

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

How do template stacks help manage firewall configurations in Panorama?

- A. By grouping templates across multiple firewalls
- B. By creating template variables for permanent configurations in firewalls
- C. By creating a diagram of the network for a view of all firewalls
- D. By handling firmware updates across multiple firewalls

Suggested Answer: A

Which subscription sends non-file format-based traffic that matches Data Filtering profile criteria to a cloud service to render a verdict?

- A. SaaS Security Inline
- B. Enterprise DLP
- C. Advanced URL Filtering
- D. Advanced WildFire

Suggested Answer: *B*

A cloud security architect is designing a certificate management strategy for Strata Cloud Manager (SCM) across hybrid environments. Which practice ensures optimal security with low management overhead?

- A. Implement separate certificate authorities with independent validation rules for each cloud environment.
- B. Configure manual certificate deployment with quarterly reviews and environment-specific security protocols.
- C. Use cloud provider default certificates with scheduled synchronization and localized renewal processes.
- D. Deploy centralized certificate automation with standardized protocols and continuous monitoring.

Suggested Answer: *D*

In which order does an NGFW process URL categories for Security policy?

- A. 1. External dynamic lists
2. Custom URL categories
3. Predefined categories
- B. 1. Custom URL categories
2. External dynamic lists
3. Predefined categories
- C. 1. Custom URL categories
2. Predefined categories
3. External dynamic lists
- D. 1. Predefined categories
2. External dynamic lists
3. Custom URL categories

Suggested Answer: A

What must be configured to successfully onboard a Prisma Access remote network using Strata Cloud Manager (SCM)?

- A. Cloud Identity Engine
- B. GlobalProtect agent
- C. IPSec termination node
- D. Autonomous Digital Experience Manager (ADEM)

Suggested Answer: C

Currently there are no comments in this discussion, be the first to comment!

Which zone is available for use in Prisma Access?

- A. Clientless VPN
- B. DMZ
- C. Interzone
- D. Intrazone

Suggested Answer: D

What is a necessary step for creation of a custom Prisma Access report on Strata Cloud Manager (SCM)?

- A. Open a support ticket.
- B. Configure a dashboard.
- C. Generate a PDF summary report.
- D. Set up Cloud Identity Engine.

Suggested Answer: *B*

A network security engineer wants to forward Strata Logging Service data to tools used by the security operations center (SOC) for further investigation.

In which best practice step of Palo Alto Networks Zero Trust does this fit?

- A. Implementation
- B. Standards and Designs
- C. Map and Verify Transactions
- D. Report and Maintenance

Suggested Answer: *D*

Which Security policy on a data center NGFW will block intrazone traffic in Zone Colorado for the Dynamic User Group "Testers" and custom application "Payment System"?

A. Source & Destination Zone = Colorado

Users = Testers -

Application = Payment System -

Action = Deny

B. Source & Destination Zone = Colorado

Users = Testers -

Application = Any -

Action = Deny

C. Source Zone = Colorado -

Destination Zone = LA -

Users = Testers -

Application = Payment System -

Action = Deny

D. Source Zone = Colorado -

Destination Zone = LA -

Users = Testers -

Application = Any -

Action = Deny

Suggested Answer: A

A primary firewall in a high availability (HA) pair is experiencing a current failover issue with ICMP pings to a secondary device. Which metric should be reviewed for proper ICMP pings between the firewall pair?

- A. Non-functional state
- B. Bidirectional Forwarding Detection (BFD)
- C. Link monitoring
- D. Heartbeat polling

Suggested Answer: *D*

Currently there are no comments in this discussion, be the first to comment!

After a firewall is associated with Strata Cloud Manager (SCM), which two additional actions are required to enable management of the firewall from SCM? (Choose two.)

- A. Install a device certificate.
- B. Configure a Security policy allowing "stratacloudmanager.paloaltonetworks.com" for all users.
- C. Configure NTP and DNS servers for the firewall.
- D. Deploy a service connection for each branch site and connect with SCM.

Suggested Answer: AD

Community vote distribution

AC (100%)

🗨️ 👤 **0b4d744** 1 month ago

Selected Answer: AC

Both of these are necessary. B is not necessary because of the default rules out of the box and D is not because it applies to specific architectures (like Prisma Access), not basic SCM firewall management.

upvoted 1 times

🗨️ 👤 **edmuffins** 1 month, 2 weeks ago

Selected Answer: AC

Configure NTP and DNS servers for the firewall: You must configure the firewall's DNS and NTP servers because this is required for the firewall to successfully connect to Strata Cloud Manager and to install software and content updates

upvoted 1 times

In which order is Prisma SD-WAN dynamic path selection performed?

- A. 1. Determine potential paths based on policy.
2. Determine link quality.
3. Measure application performance.
4. Measure link capacity.
- B. 1. Measure link capacity.
2. Measure application performance.
3. Determine link quality.
4. Determine potential paths based on policy.
- C. 1. Determine potential paths based on policy.
2. Measure application performance.
3. Determine link quality.
4. Measure link capacity.
- D. 1. Determine link quality.
2. Measure link capacity.
3. Measure application performance.
4. Determine potential paths based on policy.

Suggested Answer: A

A network engineer pushes specific Panorama reports of new AI URL category types to branch NGFWs.
Which two report types achieve this goal? (Choose two.)

- A. AI
- B. PDF summary
- C. Custom
- D. SNMP

Suggested Answer: AC

Community vote distribution

BC (100%)

  **edmuffins** 1 month, 2 weeks ago

Selected Answer: BC

AI is not a report type.

upvoted 1 times

Which two types of logs must be forwarded to Strata Logging Service for IoT Security to function? (Choose two.)

- A. WildFire
- B. Enhanced application
- C. Threat
- D. Traffic

Suggested Answer: *CD*

  **d624435** 1 week, 6 days ago

Selected Answer: *BD*

The IoT- Device Security needs Enhanced Application logging enabled and at minimum Traffic logs:

<https://docs.paloaltonetworks.com/iot/getting-started/prepare-your-firewall-for-iot-security>

Threat, WF and URL logs is enhancing the device security for vulnerability evaluation.

upvoted 1 times

Which two modes should be enabled on the GlobalProtect agent to allow a subset of users to connect directly to SaaS and internal applications while allowing the remaining users to connect through third-party VPN? (Choose two.)

- A. Remote desktop protocol (RDP)
- B. Proxy
- C. Tunnel
- D. Clientless

Suggested Answer: *BC*

How does PAN-OS identify App-IDs to perform application-layer inspection?

- A. From predefined static rules based on IP addresses and ports configured by the administrator
- B. From inspection of SSL certificates, cloud-based metadata, and manual application classification by the administrator
- C. From periodic updates that categorize web traffic based on domain names, focusing on web-browsing activities
- D. From multiple classification mechanisms - application signatures, application protocol decoding, and heuristics

Suggested Answer: *D*
