Madeupcorp.com is in the process of migrating from a third-party email system to G Suite. The VP of Marketing is concerned that her team already administers the corporate AdSense, AdWords, and YouTube channels using their @madeupcorp.com email addresses, but has not tracked which users have access to which service. You need to ensure that there is no disruption.

What should you do?

- A. Run the Transfer Tool for Unmanaged users.
- B. Use a Google Form to survey the Marketing department users.
- C. Assure the VP that there is no action required to configure G Suite.
- D. Contact Google Enterprise Support to identify affected users.

Your company has an OU that contains your sales team and an OU that contains your market research team. The sales team is often a target of mass email from legitimate senders, which is distracting to their job duties. The market research team also receives that email content, but they want it because it often contains interesting market analysis or competitive intelligence. Constant Contact is often used as the source of these messages. Your company also uses Constant Contact for your own mass email marketing. You need to set email controls at the Sales OU without affecting your own outgoing email or the market research OU. What should you do?

- A. Create a blocked senders list at the Sales OU that contains the mass email sender addresses, but bypass this setting for Constant Contact emails.
- B. Create a blocked senders list at the root level, and then an approved senders list at the Market Research OU, both containing the mass email sender addresses.
- C. Create a blocked senders list at the Sales OU that contains the mass email sender addresses.
- D. Create an approved senders list at the Market Research OU that contains the mass email sender addresses.

Your organization is part of a highly regulated industry with a very high turnover. In order to recycle licenses for new employees and comply with data retention regulations, it has been determined that certain G Suite data should be stored in a separate backup environment.

How should you store data for this situation?

- A. Use routing rules to dual-deliver mail to an on-premises SMTP server and G Suite.
- B. Write a script and use G Suite APIs to access and download user data.
- C. Use a third-party tool to configure secure backup of G Suite data.
- D. Train users to use Google Takeout and store their archives locally.

Your organization is on G Suite Enterprise and allows for external sharing of Google Drive files to facilitate collaboration with other G Suite customers. Recently you have had several incidents of files and folders being broadly shared with external users and groups. Your chief security officer needs data on the scope of external sharing and ongoing alerting so that external access does not have to be disabled.

What two actions should you take to support the chief security officer's request? (Choose two.)

- A. Review who has viewed files using the Google Drive Activity Dashboard.
- B. Create an alert from Drive Audit reports to notify of external file sharing.
- C. Review total external sharing in the Aggregate Reports section.
- D. Create a custom Dashboard for external sharing in the Security Investigation Tool.
- E. Automatically block external sharing using DLP rules.

Your employer, a media and entertainment company, wants to provision G Suite Enterprise accounts on your domain for several world-famous celebrities. Leadership is concerned with ensuring that these VIPs are afforded a high degree of privacy. Only a small group of senior employees must be able to look up contact information and initiate collaboration with the VIPs using G Suite services such as Docs, Chat, and Calendar. You are responsible for configuring to meet these requirements.

What should you do?

- A. In the Users list, find the VIPs and turn off the User setting "Directory Sharing."
- B. Create a Group for the VIPs and their handlers, and set the Group Access Level to Restricted.
- C. In Directory Settings, disable Contact Sharing.
- D. Create separate Custom Directories for the VIPs and regular employees.

A user has traveled overseas for an extended trip to meet with several vendors. The user has reported that important draft emails have not been saved in Gmail, which is affecting their productivity. They have been constantly moving between hotels, vendor offices, and airport lounges.

You have been tasked with troubleshooting the issue remotely. Your first priority is diagnosing and preventing this from happening again, and your second priority is recovering the drafts if possible. Due to time zone differences, and the user's busy meeting schedule, you have only been able to arrange a brief Hangouts Meet with the user to gather any required troubleshooting inputs.

What two actions should be taken on this call with the user? (Choose two.)

- A. Ask the user to send an email to you so you can check the headers.
- B. Record a HAR file of the user composing a new email.
- C. Take screenshots of the user's screen when composing an email.
- D. Use the Email log search in the Admin panel.
- E. Check the Users > App Users Activity report.

In your organization, users have been provisioned with either G Suite Enterprise, G Suite Business, or no license, depending on their job duties, and the cost of user licenses is paid out of each division's budget. In order to effectively manage the license disposition, team leaders require the ability to look up the type of license that is currently assigned, along with the last logon date, for their direct reports.

You have been tasked with recommending a solution to the Director of IT, and have gathered the following requirements:

- ⇒ Team leaders must be able to retrieve this data on their own (i.e., self-service).
- ⇒ Team leaders are not permitted to have any level of administrative access to the G Suite Admin panel.
- ⇒ Team leaders must only be able to look up data for their direct reports.
- ⇒ The data must always be current to within 1 week.
- ⇒ Costs must be mitigated.

What approach should you recommend?

- A. Export log data to BigQuery with custom scopes.
- B. Use a third-party tool.
- C. Use App Script and filter views within a Google Sheet.
- D. Create an app using AppMaker and App Script.

The executive team for your company has an extended retention policy of two years in place so that they have access to email for a longer period of time. Your COO has found this useful in the past but when they went to find an email from last year to prove details of a contract in dispute, they were unable to find it. It is no longer in the Trash. They have requested that you recover it.

What should you do?

- A. Using Vault, perform a search for the email and export the content to a standard format to provide for investigation.
- B. Using the Gmail Audit log, perform a search for the email, export the results, then import with G Suite Migration for Microsoft Outlook.
- C. Using the Message ID, contact Google G Suite support to recover the email, then import with G Suite Migration for Microsoft Outlook.
- D. Using the Vault Audit log, perform a search for the email, export the results. then import with G Suite Migration for Microsoft Outlook.

Your organization has just appointed a new CISO. They have signed up to receive admin alerts and just received an alert for a suspicious login attempt. They are trying to determine how frequently suspicious login attempts occur within the organization. The CISO has asked you to provide details for each user account that has had a suspicious login attempt in the past year and the number of times it occurred for each account.

What action should you take to meet these requirements?

- A. Use the login audit report to export all suspicious login details for analysis.
- B. Create a custom dashboard with the security investigation tool showing suspicious logins.
- C. Use the account activity report to export all suspicious login details for analysis.
- D. Create a custom query in BigQuery showing all suspicious login details.

In the years prior to your organization moving to G Suite, it was relatively common practice for users to create consumer Google accounts with their corporate email address (for example, to monitor Analytics, manage AdSense, and collaborate in Docs with other partners who were on G Suite.) You were able to address active employees' use of consumer accounts during the rollout, and you are now concerned about blocking former employees who could potentially still have access to those services even though they don't have access to their corporate email account.

What should you do?

- A. Contact Google Enterprise Support to provide a list of all accounts on your domain(s) that access non-G Suite Google services and have them blocked.
- B. Use the Transfer Tool for Unmanaged Accounts to send requests to the former users to transfer their account to your domain as a managed account.
- C. Provide a list of all active employees to the managers of your company's Analytics, AdSense, etc. accounts, so they can clean up the respective access control lists.
- D. Provision former user accounts with Cloud Identity licenses, generate a new Google password, and place them in an OU with all G Suite and Other Google Services disabled.

The CEO of your company heard about new security and collaboration features and wants to know how to stay up to date. You are responsible for testing and staying up to date with new features, and have been asked to prepare a presentation for management.

What should you do?

- A. Download the G Suite roadmap, and work together with a deployment specialist for new features.
- B. Create a support ticket for the G Suite roadmap, and ask to enable the latest release of G Suite.
- C. Subscribe to the G Suite release calendar, and Join the Google Cloud Connect Community.
- D. Change G Suite release track to: Rapid Release for faster access to new features.

Your company (your-company.com) just acquired a new business (new-company.com) that is running their email on-premises. It is close to their peak season, so any major changes need to be postponed. However, you need to ensure that the users at the new business can receive email addressed to them using your-company.com into their on-premises email server. You need to set up an email routing policy to accomplish this.

What steps should you take?

- A. Set up an Outbound Mail Gateway to route all outbound email to the on-premises server.
- B. Set up accounts for the new employees, and use mail forwarding rules to send to the on-premises server.
- C. Set up an Inbound Mail Gateway to reroute all inbound email to the on-premises server.
- D. Set up a Default route with split delivery to route email to the on-premises server.

Your large organization, 80,000 users, has been on Google for two years. Your CTO wants to create an integrated team experience with Google Groups, Teams Drives, and Calendar. Users will use a Google Form and Apps Script to request a new "G-Team." A "G-Team" is composed of a Google Group and a Team Drive/Secondary Calendar that is shared using that Google Group.

What two design decisions are required to implement this workflow securely? (Choose two.)

- A. The Apps Script will need to run as a G Suite admin.
- B. You will need a Cloud SQL instance to store "G-Team" data.
- C. The Google Form will need to be limited to internal users only.
- D. The Apps Script will need to run on a timed interval to process new entries.
- E. The Google Form will need to enforce Group naming conventions.

The application development team has come to you requesting that a new, internal, domain-owned G Suite app be allowed to access Google Drive APIs. You are currently restricting access to all APIs using approved whitelists, per security policy. You need to grant access for this app.

What should you do?

- A. Enable all API access for Google Drive.
- B. Enable "trust domain owned apps" setting.
- C. Add OAuth Client ID to Google Drive Trusted List.
- D. Whitelist the app in the G Suite Marketplace.

Several customers have reported receiving fake collection notices from your company. The emails were received from `accounts.receivable@yourcompany.com`, which is the valid address used by your accounting department for such matters, but the email audit log does not show the emails in question. You need to stop these emails from being sent.

What two actions should you take? (Choose two.)

- A. Change the password for suspected compromised account `accounts.receivable@yourcompany.com`.
- B. Configure a Sender Policy Framework (SPF) record for your domain.
- C. Configure Domain Keys Identified Mail (DKIM) to authenticate email.
- D. Disable mail delegation for the `accounts.receivable@yourcompany.com` account.
- E. Disable "Allow users to automatically forward incoming email to another address."

Your cyber security team has requested that all email destined for external domains be scanned for credit card numbers, and if found, the email must be encrypted using your cloud-based third-party encryption provider. You are responsible for configuring to meet this request.

What should you do?

- A. Create a content compliance rule on outbound mail and internal-sending mail using the predefined rule for credit card numbers, and add a custom header that your third-party encryption provider can scan for and encrypt.
- B. Create a content compliance rule on outbound mail using the predefined rule for credit card numbers, and check "Encrypt message if not encrypted".
- C. Create a content compliance rule on outbound mail using the predefined rule for credit card numbers, and add a custom header that your third-party encryption provider can scan for and encrypt.
- D. Create a content compliance rule on outbound mail using the predefined rule for credit card numbers, and check "Change route" to send to your third-party encryption provider to encrypt.
